Les Personnes Vulnérables:

L'état de l'insécurité alimentaire dans le monde, 2000, 2000, **Violence Against Vulnerable Groups** Hilary Brown, 2004-01-01 L'auteur présente ici l'action du Conseil de l'Europe en matière de lutte contre les abus et les mauvais traitements exercés contre les minorités puis établit un cadre général à l'intérieur duquel cette violence peut être corrigée

Droits des Personnes Âgées et Droits des Personnes Handicapées Pascal Touyem, 2023-10-22 Cette publication est certainement la toute première grande synthèse thématique et critique sur la condition des personnes socialement vulnérables PSV en Afrique. Une excellente brochure de 40 experts et Institutions de différents pays du continent a déployé un effort d'intelligibilité de ce phénomène devenu préoccupant à travers un inventaire analytique complexe, rétrospectif, factuel, actuel, chiffré, ponctuel, prospectif et relativement exhaustif. Les différentes contributions sont assorties des recommandations fortes qui interpellent pour leur application les détenteurs d'enjeu dans un processus de co-construction pour une citoyenneté de transformation active. C'est un document de plaidoyer, de requête et de lobbying en faveur de l'amélioration de la protection et de l'amélioration des conditions sociales des personnes âgées et des personnes handicapées en Afrique, autant en matière de santé, d'alimentation, de logement, d'environnement, de protection sociale, que de maintien de revenu, d'emploi et d'enseignement eu égard à l'augmentation croissante de leurs effets en valeur relative et absolue. La question des personnes socialement vulnérables est ainsi mise en avant, gardée des préoccupations politico-sociales et scientifiques importantes, voir permanentes, telle était l'objet d'investigations et de réflexions récurrentes au sein du mécanisme social de l'Union Africaine, au sein du groupe de travail sur les personnes âgées et les personnes handicapées de la Commission Africaine des Droits de l'Homme et des Peuples. L'assignation initiale et originaire tant de construire des véhicules juridiques, psychologiques, socio-anthropologiques et politiques afin d'amorcer un changement positif et une protection durable des personnes, ainsi que des protocoles coutumiers pour leur valorisation dans les cultures et traditions africaines. This publication is certainly the first major thematic and critical synthesis on the condition of socially vulnerable persons PSV in Africa. An excellent line up of 40 experts and institutions from different countries of the continent is making an effort to understand this phenomenon which has become worrying through a complex retrospective, factual, current, quantified, punctual, prospective and relatively exhaustive analytical inventory. The various contributions are accompanied by strong recommendations that challenge the holders of issues for their application in a process of co-construction for an active citizenship of transformation. It is a document of advocacy, indictment and lobbying in favor of the development, protection and improvement of the social conditions of the elderly and persons with disabilities in Africa in terms of health, food, housing, environment, social protection, income, maintenance, employment and education given their increasing numbers in relative and absolute terms. The issue of socially vulnerable people is thus brought to the forefront of important, if not permanent, political, social and scientific concerns. It is the subject of recurrent investigations and reflections within the special mechanism of the African Union, the

Working Group on Elderly Persons and Persons with Disabilities of the African Commission on Human and Peoples Rights
The initial assignment is to build legal psychological socio anthropological and political vehicles in order to initiate positive change and sustainable protection of VHPs as well as customary protocols for their valorization in African cultures and traditions

Comparative Perspectives on the Enforcement and Effectiveness of Antidiscrimination Law Marie Mercat-Bruns, David B.

Oppenheimer, Cady Sartorius, 2018-06-30 This book focuses on anti-discrimination law in order to identify commonalities and best practices across nations Almost every nation in the world embraces the principle of equality and non-discrimination in theory if not in practice As the authors expert contributions establish the sources of the principle vary considerably from international treaties to religious law traditions and more There are many approaches to methods of enforcement and other variables but the principle is nearly universal What does a comparison of the laws and approaches across different lands

reveal Readers may explore the enforcement and effectiveness of anti discrimination law from 25 nations across six continents Esteemed authors examine national regional and international systems looking for common and best practices identifying innovative approaches to long standing problems The many ways that anti discrimination law is enforced are brought to light from criminal or civil prosecution through to community resolution processes amongst others Through comparing the approaches of different lands the authors consider which methods of enforcement are effective These enriching national and international perspectives highlight the need for more creative concrete and coordinated means of enforcement to ensure the effectiveness of anti discrimination law regardless of the legal tradition concerned but in light of these traditions Readers will find each nation remarkable and learn something new and interesting from each report **La justice** Thierry Fossier,2001

The Contemporary International Committee of the Red Cross David P. Forsythe, 2024-02-01 The International Committee of the Red Cross ICRC was founded in 1863 and is often considered the gold standard in humanitarian action Despite its many positive achievements over more than 150 years some former ICRC officials believe that the organization is now in decline because of a series of recent policy choices Their view is that the organization has undermined its reputation for independent and neutral humanitarian action while growing too fast and too large which has weakened its reputation for quick tightly focused and effective action in the field David P Forsythe revisits the ICRC policy decisions of recent decades and suggests that the organization is not in fatal decline but that it does need to reconsider some of its policies at the margins Though some errors have been made and some corrections are in order Forsythe argues that its obituary is premature
