Positive Youth Development, Mental Health, and Psychological Well-Being in Diverse Youth Nora Wiium, Laura Ferrer-Wreder, Jennifer E. Lansford, Lene Arnett Jensen, 2023-06-15 In this Research Topic our aim is to examine how personal resources related to competencies skills and self perception as well as environmental contextual and relational features of the social contexts of diverse youth directly or indirectly are important to mental health and psychological well being As previous research on young people has mainly focused on youth s weaknesses rather than their strengths our use of Positive Youth Development PYD in working with culturally diverse youth and their well being in this Research Topic is novel We invite contributions from researchers that were initially presented their papers in a meeting that was held by research partners of the Cross National Project on Positive Youth Development CN PYD and who represent an international and multidisciplinary panel of experts on PYD The CN PYD was initiated in 2014 at the University of Bergen and has an ongoing data collection that involves approximately 10 000 minority and majority youth and emerging adults ages 16 to 29 living in Africa Asia Australia Europe New Zealand and South America CN PYD uses a strengths based approach to the conceptualization of youth as resources and agentic which is in opposition to the view of the developmental period of adolescence as being a period inherently fraught with problems and risks The goal of the cross national project is to assess personal strengths and contextual resources considering how these resources come together to facilitate youth thriving and to document how young people make positive and valued contributions to themselves and others We also advance research on the complex interplay between personal and contextual resources and their connections with risk behaviors and problems in essence taking a perspective of the whole child both in terms of strengths and problems

The Medicago truncatula Genome Senjuti Sinharoy, Yun Kang, Vagner Benedito, 2022-02-15 This book focuses on the discoveries in M truncatula genomic research which has been undertaken in the last two decades Legumes are important for their economic values as food feed and fodder and also serve as the pillar of sustainable agriculture because of its biological nitrogen fixation capacity Medicago truncatula was established as a model legume in the 1990s and has been well adopted as a model internationally since then M truncatula is an autogamous diploid $2n = 16$ species with a short generation time and relatively small genome size 375 Mbp The M truncatula genome was initially sequenced by the International Medicago Genome Annotation Group IMGAG in 2011 and has been well annotated M truncatula research benefits from the availability of several genetic and genomic tools such as gene expression atlas MtGEA insertion and neutron bombardment mutant populations and a HapMap panel containing 384 sequenced inbred lines for genome wide association studies This book covers the current status and latest advancements of the M truncatula genomics and transcriptomics resources along with a glimpse of newly developed tools that makes M truncatula a front runner model in functional genomic studies

Dyadic And Group Perspectives On Close Relationships Brett Laursen, 2017-10-03 The papers in this special issue apply two recent data analytic techniques to the

study of family and close peer relationships The Actor Partner Interdependent Model incorporates the perspectives of both participants in a dyad into analyses that describe shared and unique views of the relationship The Social Relations Model incorporates the perspectives of all members of a group into analyses that ascribe views unique to individuals and relationships and views shared by the entire group Developmental applications of techniques originally designed for concurrent interdependent data are described
