Protect Your Revenue — Prepare for the Change Now

The Centers for Medicare & Medicaid Services has stated there are no plans to extend the 2013 deadline. Practices that wait much longer will find themselves scrambling to make changes in ways that could be very costly — both in terms of resources and lost revenue. Practices that take action now to ensure readiness will reap the rewards of better protection of revenue, more predictable implementation costs, favorable reimbursements, and greater accuracy and efficiency.

Management: Elements, Operations, and Strategies () (Jerry) R. R. R. Ledlow, Karl Manrodt, David Schott, 2016-06-09

Ledlow BCC Supplies currently account for up to 45% of a healthcare organization's annual operating expense. The supply chain ensures that the technology of care is available to the health care professional at the right time at the right place and in sufficient quantity and quality for superior health outcomes for patients within the health system. As such, a clear understanding of the workings of the healthcare supply chain is vital to successful healthcare management today. Health Care Supply Chain Management examines supply chain management within the unique context of healthcare services delivery. The authors, with over 60 years combined experience in healthcare administration, supply chain, and academia, examine the critical topics of sourcing, logistics, security, and compliance, purchasing, storage, and inventory management, distribution, vendor management, as well as future challenges in health care. Students of health administration, public administration, public health, nursing, and other allied health professions will learn the most current and effective methods for the management of the supply chain that will contribute to success in the delivery and financing of healthcare services.

Key Features: Offers an overview of the elements of the healthcare supply chain. Examines both the operational and the strategic aspects of supply chain management. Includes a discussion of the integration of the supply chain with the clinical delivery of care. Provides a sound basis of knowledge for students so that healthcare supply chain improvements can be achieved for the mutual benefit of the healthcare industry.
