Pant Perfection

Since Adam and Eve first partook of that forbidden fruit, humans have spent immense resources to develop the perfect accoutrement for all seasons and occasions. While trends continue to evolve with various cultural and economic shifts, pants (also known as slacks) remain the most steadfast form of clothing, holding greater utility and value than all other forms of bottoms.

Pants are more sustainable than other bottoms, in terms of both manufacturing and daily usage. Ostensibly, the best clothes are the clothes a person chooses to wear frequently, without thought or second guess. In the annual Pants Symposium of 2022, Dr. Jeremy Trousers of Slack University notably said, "Pants have a psychology behind them. Pants can be worn at any time of year and are thus more likely to be worn than to stay stuck in a pile in the closet or at the bottom of a landfill."

Many people state that pants are naturally built for discomfort. However, this argument is specious at best. A survey of the student campus found that pants were not more or less comfortable than any other item of clothing. This suggests that pants are not as uncomfortable as often stated by the larger population, while also bringing to light the naturally subjective concept of "discomfort."

Pants are the best bottom covering and one of the best forms of clothing among all basic metrics. Questions about labor practices and materials used in manufacturing are worth addressing, but these apply to larger clothing industry standards. Further consideration of the clothing industry's impact on ecology and human labor is worthy and may prove to only support pants supremacy.

Business Policy and Strategic Management Elisha Stephens & Brice Martin, 2019-08-28 The knowledge of business policy and techniques of strategic management is the need of the hour to prospective business managers The present competitive environment has brought several drastic changes in policy making and strategic management Hence there is necessity of theoretical understanding about the business policy as well as strategic management Businesses need to implement sound strategies to succeed Those strategies form part of an overall management and business policy that guides the business in connecting with customers generating profits and managing resources The related concepts of strategic management and business policy are keys to help small business owners manage their responsibilities and set clear objectives Strategic management represents a theoretical concept first introduced by Peter Drucker in the mid 20th century The idea behind strategic management is that organizations will be better equipped to meet their goals and objectives if the owners and managers adopt a clear business philosophy For many businesses that philosophy will be to increase their share of the market For others it might be about making a difference in the community or about developing new products Sometimes a combination of motives drives the management's strategy In any case strategic management helps the business to keep its sights set on what matters most and to not get distracted by ancillary concerns Strategic management is the art and science of formulating implementing and evaluating cross functional decisions that will enable an organization to achieve its objectives It is the process of specifying the organization's objectives developing policies and plans to achieve these objectives and allocating resources to implement the policies and plans to achieve the organization's objectives Strategic management therefore combines the activities of the various functional areas of a business to achieve organizational objectives This book is designed to support and enhance both learning and teaching An important aspect of the style adopted for this book is the use of exhibits presenting a vast gamut of information regarding special theoretical matter
