

Excel Templates Invoice & Sales Accounting User Guide

Excel spreadsheet

The Excel Templates for Invoicing and Sales analysis and accounting quickly generates a sales invoice and provides both monthly sales analysis and accounts receivable/debtors outstanding monthly balances. A master list of accounts, including address details, and a master list of products/items, including description and unit pricing, makes the template easy to use and eliminates errors in entering account details, and item details and pricing, and calculating invoice line item values and invoice totals, including shipping and Sales/VAT tax. Sales analysis and outstanding accounts receivable/debtor balance reports and charts are automatically produced. All reports have full drilldown facilities to the individual invoice level.
