**Influence of Explicit Assessment Criteria** Anders Jönsson,Frans Prins,2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together

it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

Crime Scene Processing and Investigation Workbook, Second Edition Christine R. Ramirez, Casie L. Parish-Fisher, 2020-02-05. *Crime Scene Processing and Investigation Workbook, Second Edition* is the only workbook which directly supports and cross-references methodology and terminology presented in Ross Gardner and Donna Krouskup's perennial best seller *Practical Crime Scene Processing and Investigations Third Edition*. The workbook serves as supporting material, offering hands-on activities to supplement theories and methodologies within the text, as well as updated activities to support the new material presented in the Third Edition. As the number of forensic academic programs within the United States continues to grow and the textbook continues to be a go-to standard in the field, the workbook remains an invaluable reference for academics, forensic training providers and law enforcement training programs. The detailed Instructor's Manual (IM) lends itself not only to experts who have utilized these procedures before, but also to the novice and student who may be introduced to these topics in a classroom setting for the first time. The workbook conducts over 30 activities with detailed instructions, concept overviews and reflective post-lab questions. *Crime Scene Processing and Investigation Workbook, Second Edition* continues to stand as the best workbook on the market, addressing foundational principles in a hands-on manner while directly correlating to the concepts addressed in the Gardner and Krouskup textbook.
