

Experimental Procedure: Synthesis of Aspirin

- We measured out 2.0 grams of solid salicylic acid into a 50 mL Erlenmeyer Flask.
- We then added 5.0 mL of acetic acid and 5 drops of 85% phosphoric acid to the salicylic acid.
- The mixture was swirled, using a small amount of distilled water to rinse down any material sticking to the inner walls of the flask.
- The phosphoric acid and acetic anhydride was handled VERY carefully because both can cause skin burns.

Experimental Procedures For Aspirin:

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16 *Laboratory Manual for Principles of General Chemistry* 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause-effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section

Reading and Understanding Research Lawrence F. Locke, Stephen J. Silverman, Waneen Wyrick Spirduso, 2004-03-03 This edition contains new material on the twelve steps for doing different types of research studies a new chapter on the utilization of research and expanded coverage of qualitative research topics The authors presume no special background in research and begin by introducing and framing the notion of reading research within a wider social context Next they offer insight on when to seek out research locating and selecting the right reports and how to help evaluate research for trustworthiness A step by step reading of reports from qualitative and quantitative studies follows and the final chapters examine in greater detail the different types of research to be encountered and how to examine the research more critically

Hemostasis and Stroke Zsuzsa Bagoly, Daniel Behme, Johannes Kaesmacher, Sara Martinez De Lizarrondo, 2021-09-30 *Laboratory Manual for Principles of General Chemistry* Jo Allan Beran, 2010-11-01 This new edition of the Beran lab manual emphasizes chemical principles as well as techniques The manual helps students understand the timing and situations for the various techniques The Beran lab manual has long been a market leading lab manual for general chemistry Each experiment is presented with concise objectives a comprehensive list of techniques and detailed lab intros and step by step procedures

Discriminative Stimulus Properties of Drugs Harbans Lal, 2013-03-13 As one who has gone down the wayward path from pure organic chemistry to biochemistry to pharmacology I was not quite prepared to go all the way into the field of discriminable stimuli The organizer of the symposium on discriminable stimuli induced by drugs Dr Harbans Lal did seduce me into attending Having lost my behavioral virginity I now stare with open eyes at the field One item in particular at this meeting exemplifies to me the power of such techniques Dr Albert Weissman mentioned the problem he tackled with getting rats to discriminate between saline and dilute solutions of aspirin Under ordinary circumstances the animals could not perform this task However if the animals were sensitized by injection of prostaglandin into their foot pads then they were capable of discriminating even very dilute solutions of aspirin In a sense AI had created a model of the human arthritic who can jolly well tell if you have given him an aspirin or a salt tablet The reader of this volume will find it a good introduction to the utilization of discriminable stimuli induced by drugs After a preface by the organizer two experts discuss basic principles in separate chapters One of these chapters places emphasis on the drugs the other places emphasis on the induced cues and states

Essentials of Epidemiology in Public Health Ann Aschengrau, George R. Seage, 2013-06-03 Successfully tested in the authors courses at Boston University and Harvard University this text combines theory and practice in presenting traditional and new epidemiologic concepts Broad in scope the text opens with five chapters covering the basic epidemiologic concepts and data sources A major emphasis is placed on study design with separate chapters devoted to each of the three main analytic designs experimental cohort and case control studies Full chapters on bias confounding and random error including the role of statistics in epidemiology ensure that students are well equipped with the necessary information to interpret the results of epidemiologic studies An entire chapter is also devoted to the concept of effect measure modification an often neglected topic in introductory textbooks Up to date examples from the epidemiologic literature on diseases of public health importance are provided throughout the book The Third Edition is a thorough update that offers New examples the latest references and public health statistics Nearly 50 new review questions Updated discussion of certain epidemiologic methods New figures depicting epidemiologic concepts
