Explorations in Number Theory Cam McLeman, Erin McNicholas, Colin Starr, 2022-12-18

This innovative undergraduate textbook approaches number theory through the lens of abstract algebra Written in an engaging and whimsical style this text will introduce students to rings groups fields and other algebraic structures as they discover the key concepts of elementary number theory Inquiry based learning IBL appears throughout the chapters allowing students to develop insights for upcoming sections while simultaneously strengthening their understanding of previously covered topics The text is organized around three core themes the notion of what a number is and the premise that it takes familiarity with a large variety of number systems to fully explore number theory the use of Diophantine equations as catalysts for introducing and developing structural ideas and the role of abstract algebra in number theory in particular the extent to which it provides the Fundamental Theorem of Arithmetic for various new number systems Other aspects of modern number theory including the study of elliptic curves the analogs between integer and polynomial arithmetic p adic arithmetic and relationships between the spectra of primes in various rings are included in smaller but persistent threads woven through chapters and exercise sets Each chapter concludes with exercises organized in four categories Calculations and Informal Proofs Formal Proofs Computation and Experimentation and General Number Theory Awareness IBL Exploration worksheets appear in many sections some of which involve numerical investigations To assist students who may not have experience with programming languages Python worksheets are available on the book's website The final chapter provides five additional IBL explorations that reinforce and expand what students have learned and can be used as starting points for independent projects The topics covered in these explorations are public key cryptography Lagrange's four square theorem units and Pell's Equation various cases of the solution to Fermat's Last Theorem and a peek into other deeper mysteries of algebraic number theory Students should have a basic familiarity with complex numbers matrix algebra vector spaces and proof techniques as well as a spirit of adventure to explore the numberverse

Revisiting Women's Cinema Lingzhen Wang, 2020-12-14

In *Revisiting Women's Cinema* Lingzhen Wang ponders the roots of contemporary feminist stagnation and the limits of both commercial mainstream and elite minor cultures by turning to socialist women filmmakers in modern China She foregrounds their sociopolitical engagements critical interventions and popular artistic experiments offering a new conception of socialist and postsocialist feminisms mainstream culture and women's cinema Wang highlights the films of Wang Ping and Dong Kena in the 1950s and 1960s and Zhang Nuanxin and Huang Shuqin in the 1980s and 1990s to unveil how they have been profoundly misread through extant research paradigms entrenched in Western Cold War ideology post second wave cultural feminism and post Mao intellectual discourses Challenging received interpretations she elucidates how socialist feminism and culture were conceptualized and practiced in relation to China's search not only for national

independence and economic development but also for social emancipation proletarian culture and socialist internationalism Wang calls for a critical reevaluation of historical materialism socialist feminism and popular culture to forge an integrated emancipatory vision for future transnational feminist and cultural practices **Competitive Advantages through Clusters**

Saša Šarić,2012-03-31 The world over clusters are home to leading firms and institutions that compete on the edge of technology They can be found in developed and developing countries alike and comprise such famous ones as Silicon Valley London s financial center ceramic tile and fashion in north Italy wine in Bordeaux automotive in Stuttgart and Munich software in Bangalore and manufacturing in China s Pearl river delta Today they are studied by a variety of scholars from different fields including economists social scientists and strategists but also by a growing number of business practitioners and policy makers 3 As a result knowledge on the capacity of clusters to promote regional economic development and national prosperity and the role of local industrial policy in creating new clusters has increased rapidly in recent years The present research is best described as being exploratory in nature It elaborates and extends existing theory By doing so it takes up a distinct position within scientific theory that is defined by three levels of analysis 1 the meta methodological level 2 the methodological level and 3 the theoretical level **World History - Teacher Guide** James P.
