Echoes of Africa's Past. Archaeological explorations in the Anthropocene Savino di Lernia, 2025-05-30 Marking the 70th anniversary of the Libyan Italian archaeological Mission in the Tadrart Acacus and Messak this volume offers a multidisciplinary reflection on Africa's deep past and its enduring legacies in the Anthropocene. By tracing the echoes of human environment interactions across time it highlights how archaeological research continues to reshape our understanding of adaptation, resilience and transformation in African societies. Drawing on interdisciplinary approaches including palaeoecology, bioarchaeology, rock art analysis, the archaeology of food production and their various connections and networks, this book challenges outdated Eurocentric narratives by foregrounding African agency and complexity. Key themes include, among others, the Holocene environmental changes that influenced settlement patterns, the significance of rock art in interpreting past belief systems and the impact of colonial trade and imperial expansion on indigenous communities. *Echoes of Africa's Past* serves as a resource for archaeologists, historians, anthropologists and heritage scholars, offering fresh perspectives on Africa's dynamic past and its relevance to debates on sustainability and cultural heritage in the Anthropocene. Archaeological knowledge is incremental and hard won. It is assembled through time-intensive study of fragmentary evidence and its corpus represents intergenerational effort. Though sometimes based on the study of stones, our interpretations are not written in them. Our working hypotheses typically run ahead of the evidence needed to assess them. Expanded investigations, new methods and changing premises compel revision and sometimes outright rejection of earlier ideas. Typological aids deemed useful by earlier generations may outlive their usefulness at the same time as the evidence they organize remains pertinent and available for rethinking. The cumulative character of archaeological knowledge enables scalar perspectives across space and through time, casting what we know of one location in relief through comparison to others. These revisions, rethinkings and scalar reflections encourage us to appreciate the complexity and diversity of past contexts as amply illustrated in contributions to this volume. In short, resuscitating echoes of Anthropocene Africa is painstaking work. In this way and others, archaeology is and should be slow science. Ann B. Stahl, University of Victoria, BC, Canada

This collection showcases his mastery of gothic horror, psychological depth and lyrical poetry, presenting an array of tales that probe the human psyche, explore themes of death, love and madness, and elevate literary form through techniques such as unreliable narration and vivid imagery. Claudio Naranjo, 2020-09-22

Claudio Naranjo's psychedelic autobiography with previously unpublished interviews and research papers. Explores Dr. Naranjo's pioneering work with MDMA, ayahuasca, cannabis, iboga, and psilocybin. Shares his personal accounts of psychedelic sessions and experimentation, including his work with Alexander Sasha Shulgin and Leo Zeff. Includes the author's reflections on the spiritual aspects of psychedelics and his recommended techniques for controlled induction of altered states. In the time of the psychedelic pioneers, there were psychopharmacologists like Alexander Sasha Shulgin, psychonauts like Aldous Huxley, and psychiatrists like Humphrey Osmond. Claudio Naranjo was all three at once. He was the first to study the psychotherapeutic applications of ayahuasca, the first to publish on the effects of ibogaine, and a long-time collaborator with Sasha Shulgin in the research behind Shulgin's famous books. A Fulbright scholar and Guggenheim fellow, he worked with Leo Zeff on LSD-assisted therapy and Fritz Perls on Gestalt therapy. He was a presenter at the 1967 University of California LSD Conference and 47 years later gave the inaugural speech at the First International Conference on Ayahuasca in 2014. Across his career, Dr. Naranjo gathered more clinical experience in individual and group psychedelic treatment than any other psychotherapist to date. In this book, his final work, Dr. Naranjo shares his psychedelic autobiography along with previously unpublished interviews, session accounts, and research papers on the therapeutic effects of psychedelics, including MDMA, ayahuasca, cannabis, iboga, and psilocybin. The book includes Naranjo's reflections on the spiritual aspects of psychedelics and the healing transformations they bring, his philosophical explorations of how psychedelics act as agents of deeper consciousness, and his recommended techniques for controlled induction of altered states using different visionary substances. Naranjo's work shows that psychedelics have the strongest potential for transforming and healing people over all therapeutic methods currently in use.
