Questions & Answers

1. During which season does the rabbit population increase most rapidly?

- A. spring
- B. summer
- C. fall
- D. winter

Correct Answer: A. spring

Explanation: In the spring, the warm weather and the increase in the availability of food enable the populations to increase quickly. The end of severe winter weather reduces the likelihood of death due to extreme cold. Because of these favorable conditions, most animals give birth to their young in the spring.
