Background: The pitch of a sound, or how often it vibrates, is related to the frequency of the sound waves. The greater the frequency of sound waves reaching your ears, the more often they vibrate the frequency and the pitch within. The rate of frequency is then faster than.

Question: What causes the Doppler shift?

- Consider a situation where a car is moving to the right and a car is moving to the left. Assume the car is moving to the right and the car is moving to the left.
 - Assume the frequency of the sound waves is constant. The car is moving to the right. How does the frequency of the sound waves change? (They are closer together.)
 - Assume the frequency of the sound waves is constant. The car is moving to the left. How does the frequency of the sound waves change? (They are further apart.)
