

Use the following information to answer questions 1–3.

Name: _____

Date: _____

Section 1: Population Growth

Background: The world's population is growing rapidly. In 1950, there were about 2.5 billion people on Earth. By 2020, the population is expected to reach about 8 billion. This growth is due to a combination of factors, including a decline in death rates and an increase in birth rates.

Three knowledge gaps have been identified (see below). Complete the tasks below.

1. Suppose you were charged with advising a local authority on the issue of birth rates. Should you encourage people to have more children? Explain why or why not.

My response is: _____

2. What do you think would happen if you increased your birth rate with all women?

I think it would: _____

Task 2: Population Growth

A **population pyramid** is a chart that shows the number of people in different age groups. It is used to show the distribution of the population in a country. The pyramid is divided into two halves, with males on the left and females on the right. The width of the bars represents the number of people in each age group.

The **Dependency Ratio** is a measure of the number of people who are not of working age (under 15 and over 64) relative to the number of people who are of working age (15–64). It is calculated as follows:

1. Which population pyramid is the most developed?

2. Which country's population is growing most rapidly?

3. What is the **Dependency Ratio** for each country? What do you think about the size of the ratio?
