[A Practical Guide to Scientific Writing in Chemistry](#) Andrew Terhemen Tyowua, 2023-03-31

Successful completion of postgraduate studies especially PhD and career advancement in academia strongly depend on the ability to publish scientific papers or books and attract research grants. However, many chemical scientists find preparing scientific papers and research grant and book proposals difficult, partly because of insufficient training in writing and partly because there are few practical books to enable them to learn the art. This step-by-step practical guide is intended mainly for postgraduate students and early career researchers in chemical science and the libraries that serve them but will also be useful to other scientists.

Key Features: Improves the reader's chances of getting their manuscript published in chemistry journals; Increases the likelihood of winning research grants in chemistry; Takes a lead-by-the-hand approach; Contains chapters on the preparation of graphical abstracts and research highlights; Uses sketches and other illustration styles to aid mental visualization of concepts; Contains practical examples taken from published papers and successful research grant proposals.

[World Ocean Assessment](#) Alan Simcock, 2017-04-17

This United Nations report examines the current state of knowledge of the world's oceans for policymakers and provides a reference for marine science courses.

The Secret History of Sharks John Long,2025-07-01 From ancient megalodons to fearsome Great Whites this book tells the complete untold story of how sharks emerged as Earth s ultimate survivors by world leading paleontologist John Long Will keep you on the edge of your seat from its first page to its last page Jared Diamond Pulitzer Prize winning author of Guns Germs and Steel Sharks have been fighting for their lives for 500 million years and today are under dire threat They are the longest surviving vertebrate on Earth outlasting multiple mass extinction events that decimated life on the planet But how did they thrive for so long By developing superpower like abilities that allowed them to ascend to the top of the oceanic food chain John Long who for decades has been on the cutting edge of shark research weaves a thrilling story of sharks unparalleled reign The Secret History of Sharks showcases the global search to discover sharks largely unknown evolution led by Long and dozens of other extraordinary scientists They embark on digs to all seven continents investigating layers of rock and using cutting edge technology to reveal never before found fossils and the clues to sharks singular story As the tale unfolds Long introduces an enormous range of astonishing organisms a thirty foot long shark with a deadly saw blade of jagged teeth protruding from its lower jaws a monster giant clams crusher and bizarre sharks fossilized while in their mating ritual The book also includes startling new facts about the mighty megalodon with its sixty six foot long body massive jaws and six inch serrated teeth With insights into the threats to sharks today how they contribute to medical advances and the lessons they can teach us about our own survival The Secret History of Sharks is a riveting look at scientific discovery with ramifications far beyond the ocean

Legal Protection for Computer-Implemented Inventions Sabine Kruspig,Claudia Schwarz,2016-04-24 As a result of the incorporation of computer software into countless commercial and industrial products the patentability of software has become a vital issue in intellectual property law This indispensable book provides an overview on the current status of computer implemented inventions in patent law across Europe and major jurisdictions worldwide A hugely practical field research tool with guidance based on case law it examines the major hurdles in each particular country and describes the best practice to be adopted Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings this book covers such issues and topics as the following claim categories for patent applications sufficient level of abstraction breadth of the claimed invention fundamental terms of computing and terminological traps probability for patents dependent on software application areas and patents in core areas of computing With separate chapters for the key countries Germany the United Kingdom France the United States China Korea Japan India and the European Patent Office the legal situation for computer implemented inventions in each country or region this book includes guidance on prosecution under national law analyses of

relevant court decisions practice checklists and an outlook on future developments The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction With this incomparable resource patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law

Plant Quarantine Challenges under Climate Change Anxiety Kamel A. Abd-Elsalam, Salah M. Abdel-Momen, 2024-05-15 The effects of climate change on food safety and plant health represent a relatively new area of study However evidence from recent studies is clear climate change contributes to increased and new food safety plant health risks as one of several global change factors This volume analyzes the scientific understanding of the relationship between climate change food safety plant pests plant diseases and trade It identifies and discusses four key areas for future policy consideration risk assessment SPS capacity in developing countries climate change resilience and basic research challenges We must effectively communicate the impacts of climate change on plant health and build the capacity of national plant protection organizations More importantly we need to mobilize resources that will help build stronger national phytosanitary systems that can prevent the spread of plant pests thereby protecting our food sources and environment and facilitating safe trade The present volume is an asset for plant quarantine personnel working in the field agricultural university students plant health workers farmers doing agriculture plant seed traders and all those who use agricultural produce and products The book is a useful resource for students and professional plant pathologists entomologists and plant breeders because it summarizes current knowledge and suggests new research directions It is also suitable for ecologists researchers working on crop protection climate change and pest control

Metazoa Peter Godfrey-Smith, 2020-11-10 Enthralling breathtaking *Metazoa* brings an extraordinary and astute look at our own mind s essential link to the animal world The New York Times Book Review Editors Choice A great book Godfrey Smith is brilliant at describing just what he sees the patterns of behaviour of the animals he observes Nigel Warburton Five Books The scuba diving philosopher who wrote *Other Minds* explores the origins of animal consciousness Dip below the ocean s surface and you are soon confronted by forms of life that could not seem more foreign to our own sea sponges soft corals and serpulid worms whose rooted bodies intricate geometry and flower like appendages are more reminiscent of plant life or even architecture than anything recognizably animal Yet these creatures are our cousins As fellow members of the animal kingdom the *Metazoa* they can teach us much about the evolutionary origins of not only our bodies but also our minds In his acclaimed 2016 book *Other Minds* the philosopher and scuba diver Peter Godfrey Smith explored the mind of the octopus the closest thing to an intelligent alien on Earth In *Metazoa* Godfrey Smith expands his inquiry to animals at large investigating the evolution of subjective experience with the assistance of far flung species As he delves into what it feels like to perceive and interact with

the world as other life forms do Godfrey Smith shows that the appearance of the animal body well over half a billion years ago was a profound innovation that set life upon a new path In accessible riveting prose he charts the ways that subsequent evolutionary developments eyes that track for example and bodies that move through and manipulate the environment shaped the subjective lives of animals Following the evolutionary paths of a glass sponge soft coral banded shrimp octopus and fish then moving onto land and the world of insects birds and primates like ourselves Metazoa gathers their stories together in a way that bridges the gap between mind and matter addressing one of the most vexing philosophical problems that of consciousness Combining vivid animal encounters with philosophical reflections and the latest news from biology Metazoa reveals that even in our high tech AI driven times there is no understanding our minds without understanding nerves muscles and active bodies The story that results is as rich and vibrant as life itself *Turn Down the Heat* World Bank Publications,2014-11-20 A Report for the World Bank by the Potsdam Institute for Climate Impact Research and Analytics
