Eyes On The Prize Fighting Back Questions:

Hollywood or History? Sarah J. Kaka, 2022-01-01 The rationale for the present text *Hollywood or History An Inquiry Based Strategy for Using Film to Teach About Inequality and Inequity Throughout History* stems from two main things First and foremost is the fact that the reviews of the first two volumes in the *Hollywood or History* series have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioners Classroom utility and teacher practice have continued to be the primary objectives in developing the *Hollywood or History* strategy The second thing is that this most recent volume in the series takes it in a new direction rather than focusing on eras in history it focuses on the themes of inequity and inequality throughout history and how teachers can utilize the *Hollywood or History* strategy to tackle some of the more complicated content throughout history that many teachers tend to shy away from There is a firm belief that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching challenging topics such as inequity and inequality in terms of gender race socioeconomic status and so much more The book provides 30 secondary lesson plans grades 6 12 that address nine different topics centered around inequity and inequality throughout history many of which connect students to the world we are living in today The intended audience for the book are teachers who teach social studies at the 6th 12th grade level both in the United States and other countries An additional audience will be college and university social studies history methods professors in the United States and worldwide

The Promise, 2004 *The Politics of Community Policing* William (Bill) Thomas Lyons, 2010-05-06 In this in depth examination of community policing in Seattle William T Lyons Jr explores the complex issues associated with the establishment and operation of community policing an increasingly popular method for organizing law enforcement in this country Stories about community policing appeal to a nostalgic vision of traditional community life Community policing carries with it the image of a safe community in which individual citizens and businesses are protected by police they know and who know them and their needs However it also carries an image of community based in partnerships that exclude the least advantaged strengthen the police and are limited to targeting those disorders feared by more powerful parts of the community and most amenable to intervention by professional law enforcement agencies The author argues that the politics of community policing are found in the construction of competing and deeply contested stories about community and the police in environments characterized by power imbalances Community policing according to the author colonizes community life increasing the capacity of the police department to shield itself from criticism while manifesting the potential for more democratic forms of social control as evidenced by police attention to individual rights and to impartial law enforcement This book will be of interest to sociologists and political scientists interested in the study of community power and local politics as well as criminologists interested in the study of police William T Lyons Jr is Assistant Professor of Political Science University of Akron He previously worked for the Seattle Police Department

Imagining Black America Michael Wayne, 2014-02-25 DIVScientific research has now established that race should be understood as a social construct not a true biological division of humanity In Imagining Black America Michael Wayne explores the construction and reconstruction of black America from the arrival of the first Africans in Jamestown in 1619 to Barack Obama's reelection Races have to be imagined into existence and constantly reimagined as circumstances change Wayne argues and as a consequence the boundaries of black America have historically been contested terrain He discusses the emergence in the nineteenth century and the erosion during the past two decades of the notorious one drop rule He shows how significant periods of social transformation emancipation the Great Migration the rise of the urban ghetto and the Civil Rights Movement raised major questions for black Americans about the defining characteristics of their racial community And he explores how factors such as class age and gender have influenced perceptions of what it means to be black Wayne also considers how slavery and its legacy have defined freedom in the United States Black Americans he argues because of their deep commitment to the promise of freedom and the ideals articulated by the Founding Fathers became and remain quintessential Americans the incarnation of America in the words of the civil rights leader A Philip Randolph div
