It's everywhere. Students need to analyze, resist, critique, and create. Media literacy educators have always insisted that we are both creators and receivers of media messages. The truth of this is even more apparent in today's digital environment with children and adults alike participating in a ubiquitous nonstop stream of social media. Clearly, students need the tools to interpret news and information critically, not just for school but for life in a post-truth world where the lines blur between entertainment, information, and persuasion. Renee Hobbs demonstrates how a global perspective on contemporary propaganda enables educators to stimulate both the intellectual curiosity and the cultural sensitivities of students. Replete with classroom and online learning activities and samples of student work, *Mind Over Media* provides a state-of-the-art look at the theory and practice of propaganda in contemporary society and shows how to build learners' critical thinking and communication skills on topics including computational propaganda, content marketing, fake news, and disinformation.

Hochman, Natalie Wexler, 2017-08-07 Why you need a writing revolution in your classroom and how to lead it. The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated over and over that it can turn weak

writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There s no separate writing block and no separate writing curriculum Instead teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what s most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content
