Structural Repair of Traditional Buildings PEB

Robson,2015-11-17 This book will be of interest to everyone involved in the repair maintenance and refurbishment of traditional buildings Its purpose is to promote the successful structural repair of masonry timber and unfired earth The book begins by explaining how traditional structures work and how they are affected by the behaviour of the soil that supports them It goes on to explain how the structural design of buildings has to cope with uncertainty Techniques for doing so are well established for new buildings but the viewpoint changes when existing buildings need to be repaired or refurbished The most common sources of structural damage are listed The more serious and progressive ones are described in detail as an aid to diagnosis and prognosis An understanding of prognosis enables repairers to decide whether urgent intervention is necessary or whether the problem can be allowed to run its course A straightforward method is proposed for arriving at the most suitable remedy Several typical repairs are illustrated The book covers many allied topics including the principles of conservation health and safety and preventative maintenance A chapter is devoted to the special needs of insured perils

Structural Foundation Designers' Manual W. G. Curtin,Gerry Shaw,Gary Parkinson,J. Golding,Norman

Seward,2006-12-04 This manual for civil and structural engineers aims to simplify as much as possible a complex subject which is often treated too theoretically by explaining in a practical way how to provide uncomplicated buildable and economical foundations It explains simply clearly and with numerous worked examples how economic foundation design is achieved It deals with both straightforward and difficult sites following the process through site investigation foundation selection and finally design The book includes chapters on many aspects of foundation engineering that most other books avoid including filled and contaminated sites mining and other man made conditions features a step by step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in this much neglected yet extremely economical foundation solution concentrates on foundations for building structures rather than the larger civil engineering foundations includes many innovative and economic solutions developed and used by the authors practice but not often covered in other publications provides an extensive series of appendices as a valuable reference source For the Second Edition the chapter on contaminated and derelict sites has been updated to take account of the latest guidelines on the subject including BS 10175 Elsewhere throughout the book references have been updated to take account of the latest technical publications and relevant British Standards

Dynamics in GIScience

Igor Ivan, Jiří Horák, Tomáš Inspektor,2017-08-23 This book is intended for researchers practitioners and students who are interested in the current trends and want to make their GI applications and research dynamic Time is the key element of contemporary GIS mobile and wearable electronics sensor networks UAVs and other mobile snoopers the IoT and many other resources produce a massive amount of data every minute which is naturally located in space as well as in time Time series data is transformed into almost from the human perspective continuous data streams which require changes to the concept of spatial data recording storage and manipulation This book

collects the latest innovative research presented at the GIS Ostrava 2017 conference held in 2017 in Ostrava Czech Republic under the auspices of EuroSDR and EuroGEO The accepted papers cover various aspects of dynamics in GIScience including spatiotemporal data analysis and modelling spatial mobility data and trajectories real time geodata and real time applications dynamics in land use land cover and urban development visualisation of dynamics open spatiotemporal data crowdsourcing for spatiotemporal data and big spatiotemporal data **Concrete in the Service of Mankind** Ravindra Dhir,Neil Henderson,2003-09-02 Concrete is ubiquitous and unique found in every developed and developing country Indeed there are no alternatives to concrete as a volume construction material for infrastructure This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term and to encourage further radical development Equally it must be environmentally friendly during manufacture in an aesthetic presentation in structures and in the containment of harmful materials The central theme of the Congress is Concrete in the Service of Mankind under which five self contained Conferences each dealing with a particular aspect are planned The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation underwritten by sound technical understanding and research base It brings together the shared skills and experience of the various disciplines involved in the construction process world wide This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings This book should be of interest to concrete technologists contractors civil engineers consultants government agencies research organizations *ICE Manual of Geotechnical Engineering Volume 1* Hilary Skinner,D G Toll,Kelvin Higgins,Mike Brown,John Burland,2023-11-17 ICE Manual of Geotechnical Engineering Second edition brings together an exceptional breadth of material to provide a definitive reference on geotechnical engineering solutions Written and edited by leading specialists each chapter provides contemporary guidance and best practice knowledge for civil and structural engineers in the field **Earthworks** N. A. Trenter,2001 Nothing can be built without some excavation and transfer of soil or rock from one part of a site to another and this makes earthworks the most common product of civil engineering operations Although normally seen as major structures such as earth fill dams or large highways or railway embankments the majority of earthworks are connected with minor civil works and building construction Whatever the type of work the principles are the same Earthworks a guide accumulates information on topics that are essential to earthworks engineering BRE Digest ,2003 ICE Manual of Geotechnical Engineering Volume 2 Hilary Skinner,D G Toll,Kelvin Higgins,Mike Brown,John Burland,2023-11-17 ICE Manual of Geotechnical Engineering Second edition brings together an exceptional breadth of material to provide a definitive reference on geotechnical engineering solutions Written and edited by leading specialists each chapter provides contemporary guidance and best practice knowledge for civil and structural engineers in the field **High-rise Manual** Johann

Eisele, Ellen Kloft, 2003 What constitutes a high rise building A high rise is in fact any building with more than 9 storeys and not just those striking skyscrapers which shape modern city skylines In the past architects who designed such structures used to be the exception but in the last 10 years more and more architectural offices have begun to focus on this type of building However the sheer complexity of designing and planning the construction of a high rise as opposed to other building types requires a wealth of specialized experience and expertise The High Rise Manual is the first comprehensive reference work on this subject All relevant aspects of such an undertaking are examined in detail by some 24 specialist authors Each step is extensively documented including the initial project planning the building organisation the laying of the foundations the supporting structure the building technology the office design and the Facility Management Theoretical contributions present the basic principles of select
