

L'odyssée des plantes sucrières

Il a fallu quelque 2000 ans à la canne à sucre pour accomplir le tour du monde et d'implanter sur la quasi totalité des zones tropicales, mais d'un siècle aura suffi à la betterave sucrière pour s'installer dans les régions tempérées et d'imposer comme la seule véritable alternative au « royaume sucré ».

À la fois rivales et complémentaires, ces deux cultures et leur raison d'être - la production de sucre - ont accompagné les grands mouvements migratoires et joué un rôle essentiel dans le développement des échanges commerciaux. Ce document évoque l'histoire d'une ressource géostratégique.

Aux origines de la canne à sucre

Originaire de Nouvelle Guinée, la canne à sucre est cultivée dès le III^e siècle avant J.-C. dans cette zone d'Océanie et des îles du Pacifique. Au cours des siècles suivants, elle suit les flux migratoires vers l'Indonésie, l'Inde et le sud de la Chine. Les Perses de l'époque s'en débarrassent lors de leurs conquêtes et l'introduisent au nord de l'Afrique et du Moyen-Orient. Elle est ensuite introduite dans les régions d'Égypte et d'Océanie pendant l'Antiquité.

L'âge d'or méditerranéen

Au VII^e siècle, les Arabes introduisent la canne en ce qui est aujourd'hui l'Espagne et en rapportent la canne à sucre qu'ils implantent dans les vallées du Nil et du Jourdain, puis dans tout le monde musulman du haut Moyen-Âge (Chypre, Sicile, Sardes, Andalousie...). Les Croisés permettent aux Occidentaux de découvrir le sucre produit dans ces régions et les premiers circuits d'importation de sucre se mettent en place, notamment à Venise.

La conquête de l'Ouest

Au XIV^e siècle, les Portugais et les Espagnols implantent la canne à sucre sur les îles du Mexique et des Caraïbes qui, traditionnellement, servaient de comptoirs vers l'Amérique du Nord et le Royaume-Uni. Au XVI^e siècle et les siècles suivants, l'Amérique du Nord et l'Amérique du Sud sont également conquises. La canne à sucre est introduite dans ces régions et les premiers circuits d'importation de sucre se mettent en place, notamment à Venise.

La betterave révèle son potentiel

Depuis des siècles, la betterave est utilisée en Europe pour ses racines et ses feuilles. Elle est introduite en France au XVI^e siècle. Elle est utilisée pour la production de sucre à partir de la racine. Au XVIII^e siècle, elle est introduite en France et devient la principale source de sucre en France. Après l'effacement de la canne à sucre, la betterave sucrière est introduite en France au XVIII^e siècle. Elle est utilisée pour la production de sucre à partir de la racine. Au XVIII^e siècle, elle est introduite en France et devient la principale source de sucre en France.

Betterave sucrière naissance d'une filière stratégique en Europe

En 1747, le chimiste suédois Carl Wilhelm Scheele découvre que la betterave sucrière peut être utilisée pour la production de sucre. Cette découverte est suivie de la mise en place d'une filière industrielle de production de sucre à partir de la betterave sucrière. Cette filière devient rapidement la principale source de sucre en Europe et dans le monde. Elle est utilisée pour la production de sucre à partir de la racine. Au XVIII^e siècle, elle est introduite en France et devient la principale source de sucre en France.
