Stefanos Geroulanos, Gisèle Sapiro

History 1301 Chapter 4:

History After Hitler Philipp Stelzel, 2018-06-15 The decades following the end of World War II witnessed the establishment of a large and diverse German American scholarly community studying modern German history As West Germany's formerly deeply nationalist academic establishment began to reconcile itself with postwar liberalism American historians played a crucial role both assisting and learning from their German counterparts efforts to make sense of the Nazi past and to reconstruct how German society viewed it In History After Hitler Philipp Stelzel puts this story center stage for the first time positioning the dialogue between German and American historians as a key part of the intellectual history of the Federal Republic and of Cold War transatlantic relations Making extensive use of previously inaccessible or unexplored personal papers and institutional files in German and American archives Stelzel demonstrates that several factors fostered the growth of this transatlantic scholarly community As a result of both National Socialism and the Cold War American interest in Germany grew remarkably In addition a small but increasingly influential cohort of German migr historians working in the United States served as transatlantic intermediaries Finally the strong appeal of American academia to West German historians of different generations led many of them to form and maintain close ties with their American colleagues History After Hitler explores how these historians participated as public intellectuals in debates about how to cope with the Nazi past believing that the historical awareness of West German citizens would bolster the Federal Republic's democratization Stelzel also corrects simplistic arguments regarding the supposed Westernization of the Federal Republic emphasizing that American scholars too benefited from the transatlantic conversation History After Hitler makes the case that together German and American historians contributed to the development of postwar German culture intellectual life and national self understanding

Chronicle Into History Louis Green, 1972-09-14 In Florence in the fourteenth and early fifteenth centuries the essentially medieval values of the age of Dante were transformed into the intellectual attitudes characteristic of the early Renaissance Mr Green examines this change as it was reflected in the works of the city's vernacular chroniclers These merchant historians evolved out of the traditional universal chronicle of the Middle Ages an embryonic form of the modern history exemplified at the beginning of the fifteenth century by the *Istoria di Firenze* of Goro Dati In the course of this transition from chronicle to history the world view expressed by the chronicle which assumed that all that happened contributed to a divinely inspired historical plan yielded before a more selective conception of the significance of events as possible natural causes of change At the same time the ideals underlying the medieval sense of cosmic order with their otherworldly overtones gave way before the more secular humanist values of the emerging Renaissance

The Four Nations Frank Welsh offers a lively narrative history of the four component parts of the British Isles England Ireland Scotland and Wales Moving from the Roman period which first defined many of the current internal boundaries through the present day Welsh describes the history of each nation their interactions and the impacts of crises ranging from the Norman Invasion to the Protestant Reformation to the two world wars of the twentieth century Along the way Welsh questions many cherished illusions and poses some awkward questions to what extent were Scotland Ireland and Wales victims of predatory English aggression How serious is the frequently invoked specter of national fragmentation
