Intelligent Environments 2009 Victor Callaghan, 2009 As computers are increasingly embedded into our everyday environments the objects therein become augmented with sensors processing and communication capabilities and novel interfaces The capability for objects to perceive the environment store and process data pursue goals reason about their intentions and coordinate actions in a holistic manner gives rise to the so called Intelligent Environment IE In such environments real space becomes augmented with digital content thus transcending the limits of nature and of human perception The result is a pervasive transparent infrastructure capable of recognizing responding and adapting to individuals in a seamless and unobtrusive way The realization of Intelligent Environments requires the convergence of different disciplines such as information and computer science building architecture material engineering artificial intelligence sociology art and design The 5th International Conference on Intelligent Environments IE 09 held at the Polytechnic University of Catalonia Castelldefels Barcelona Spain provides a multidisciplinary forum for researchers and engineers from across the world to present their latest research and to discuss future directions in the area of Intelligent Environments The IE 09 proceedings contain the complete conference program including full papers presented at special sessions and short papers from the doctoral colloquium and poster session In addition three thought provoking invited lectures on topics of current and future IE research are included

Game-Based Learning and the Power of Play Pauline Rooney, Nicola Whitton, 2016-08-17 In recent years there has been growing interest in the use of games to enhance learning across multiple educational levels and extensive research has shown that games have considerable potential for enhancing learning motivation and skills development However despite a growing acknowledgement of this potential challenges remain and the use of games in formal education contexts remains far from mainstream While some studies identify design and development issues as a key barrier including associated costs others highlight organisational and infrastructural difficulties involved in implementing games in the classroom More recently increasing recognition of these

difficulties has led many to explore how gaming elements rather than fully fledged games can be used to engage and enhance student learning a practice now widely referred to as gamification This edited collection of chapters explores the application potential and challenges of game based learning and gamification across multiple disciplines and sectors including psychology education business history languages and the creative arts With contributions exploring the use of games across the full educational spectrum from early childhood education through to the corporate sector it provides comprehensive insights into the potential of games and play for facilitating learning and engagement at every life stage
