Student success validates what we teachers do Yet not all students succeed Many give up helplessly
reaching unnecessarily the end of their ropes We teachers spent years honing our craft figuring out ways to reach out to
connect and to positively affect the lives of our students not only while in college but well beyond the often treacherous
college years Paving the students path toward a thriving university life and a rewarding career therefore gives meaning to
what we do for a living The art of learning has indeed transformed Both the Internet and distinct generational preferences of
our students have introduced new paradigms in post secondary education Whereas years ago the teacher and the local
university library were the main repositories of knowledge today's students can use the Internet indeed the libraries of the
entire planet to instantly locate the information they need often effortlessly from the comfort of a couch What the students
want is not mere information they need and demand practical knowledge and how information is applied To be a successful
teacher one must constantly experiment with new and more effective learning strategies that combine best practices in
learning In this book the authors have assembled numerous strategies and techniques for academic success We have emptied
our bags of tricks onto these pages We have witnessed how these strategies rejuvenate our students university experience By
authoring this book we pass on to you our student the intricacies of the art of learning From the role of motivation to memory
retention to the ins and outs of connecting with your teachers we have provided not only what is needed to succeed
academically but also the evidence for our recommendations We offer you this book not only for us to make sense of our
professional lives but also for you to make sense of yours *Medical Record* George Frederick Shrady, Thomas Lathrop
