

HYPOTHESIS

A hypothesis is a tentative statement or explanation that proposes a possible relationship between variables and is subject to testing and verification.

OVERVIEW

A hypothesis is a testable prediction that seeks to explain a phenomenon or make a statement about the relationship between variables. It is formulated based on prior knowledge, observations, or theories. Hypotheses serve as a starting point for scientific investigation, and their validity is assessed through empirical evidence.

EXAMPLES

Null Hypothesis: The null hypothesis is a statement that suggests no significant relationship or effect between variables.

Alternative Hypothesis: The alternative hypothesis is a statement that proposes a specific relationship or effect between variables, challenging the null hypothesis.

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez, Stephanie M. Gardner, Trevor R.

Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) [Inquiry-Based Learning - Undergraduate Research](#)

Harald A. Mieg, 2019-04-12 This open access book provides a systematic overview of experiences with Inquiry Based Learning IBL and undergraduate research UR in German universities covering both research universities Universit ten and universities of applied sciences Fachhochschulen Divided into three parts the book starts with the principles and common practices of IBL UR at all universities Part Two discusses the implementation of IBL UR for twenty one individual disciplines ranging from architecture to theology Part Three discusses the potential of IBL UR in relation to several topics including diversity digitalisation different forms of universities and the national job market The book summarises the project of the German network of UR comprising approximately 50 universities and results of a national initiative called Qualit tspakt Lehre which is intended to improve teaching at German universities Today IBL and UR are essential parts of high impact education strategies for universities around the world In his university reform plans of the early 19th century Wilhelm von Humboldt introduced Inquiry Based Teaching and Learning as the core principle of the modern research university in Germany as well as worldwide IBL was re discovered in the German university reform initiatives of the 1960s Since then IBL has been applied in teachers education in German universities The book presents IBL UR experience as complementary to what is usually presented in English speaking academia In Germany IBL UR is applied broadly throughout the social sciences and planning but not in the core sciences whereas in the US undergraduate research is common in the sciences but less so in the social sciences Moreover in Germany IBL UR is often linked to applied and community oriented research something that is just emerging in the US **How Civic Action Works** Paul Lichterman, 2020-12-15 The ways that social advocates organize to

fight unaffordable housing and homelessness in Los Angeles illuminated by a new conceptual framework for studying collective action *How Civic Action Works* renews the tradition of inquiry into collective social problem solving Paul Lichterman follows grassroots activists nonprofit organization staff and community service volunteers in three coalitions and twelve organizations in Los Angeles as they campaign for affordable housing develop new housing or address homelessness Lichterman shows that to understand how social advocates build their campaigns craft claims and choose goals we need to move beyond well established thinking about what is strategic Lichterman presents a pragmatist inspired sociological framework that illuminates core tasks of social problem solving both contentious and noncontentious by grassroots and professional advocates alike He reveals that advocates distinct styles of collective action produce different understandings of what is strategic and generate different dilemmas for advocates because each style accommodates varying social and institutional pressures We see too how patterns of interaction create a cultural filter that welcomes some claims about housing problems while subordinating or delegitimizing others These cultural patterns help solve conceptual and practical puzzles such as why coalitions fragment when members agree on many things and what makes advocacy campaigns separate housing from homelessness or affordability from environmental sustainability Lichterman concludes by turning this action centered framework toward improving dialogue between social advocates and researchers Using extensive ethnography enriched by archival evidence *How Civic Action Works* explains how advocates meet the relational and rhetorical challenges of collective action
