Congress. House. Committee on the Judiciary. Subcommittee on Regulatory Reform, Commercial and Antitrust Law, 2014 *Taxation in the Digital Economy* Nella Hendriyetty, Chris Evans, Chul Ju Kim, Farhad Taghizadeh-Hesary, 2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Federal Register, 2013-10 *Financial Services and General Government Appropriations for 2013* United States. Qualified Intermediary Ross K. McGill, Kirsty V. Pitkin, 2025-03-15 Multiple jurisdictions have been and continue to converge their taxation frameworks to eradicate cross border tax evasion and establish common principles under which non resident financial institutions can become withholding agents for non resident investors and establish rules to prevent and detect cross border tax evasion The US began this convergence with its Qualified Intermediary agreement framework in 2001 with Revenue Procedure 2000 12 the QI Agreement Ireland followed the US model with its Qualified Intermediary and Authorised Withholding Agent AWA program and Japan has adopted a Qualified Foreign Intermediary QFI system More recently in 2023 the European Commission proposed a new Directive for standardisation and simplification of cross border

withholding tax across 27 Member States FASTER Once agreed upon the Directive is expected to go into force on January 1 2030 All these frameworks have a commonality of purpose and in many cases commonality of implementation principles Differences lie in the practical implementation of these frameworks by financial institutions who may have to adopt different procedures and policies depending on the nature and residency of their clients and the markets in which they choose to invest This book will be of interest to financial services professionals and institutional investors including custodians and brokers

Financing Infrastructure Richard M. Bird, Enid Slack, 2017-12-04 Politicians and citizens universally agree that Canada's urban infrastructure urgently needs work Roads and bridges are overdue for repair aging water systems should be replaced sewage must be adequately treated urban transit needs to be updated and extended and it is necessary that public housing as well as schools health centres and government offices are brought up to current standards But few cities have room to raise additional revenue and the federal and provincial governments to which they turn for financial support are already in deficit so who is going to pay for all of this Bringing together perspectives and case studies from across Canada the US and Europe Financing Infrastructure argues that the answer to the question Who should pay should always be users Headed by two of Canada's foremost experts on municipal finance this book provides a closer look at why charging user fees makes sense how much users should pay how to charge fees well and where present processes can be improved and how to convince the politicians and the public of the importance of pricing infrastructure correctly Across the disciplines of public policy urban studies and economics almost no one is looking at the extent to which users should play a role in infrastructure planning Financing Infrastructure contends that the users not federal and provincial taxpayers should start paying directly for their cities repairs and expansions Contributors include Richard M Bird University of Toronto Bernard Dafflon University of Fribourg Switzerland Robert D Ebel Local Governance Innovation and Development Harry Kitchen Trent University Jean Philippe Meloche Universit de Montr al Matti Siemiatycki University of Toronto Enid Slack University of Toronto Almos T Tassonyi University of Calgary Lindsay M Tedds University of Victoria Francois Vaillancourt Universit de Montr al and Yameng Wang World Bank

Formalisation Through Taxation Jonas Richter, 2019-10-09 In developing countries such as Paraguay informality remains a prevalent and persistent issue Many avoid formal registration with the authorities and evade tax payments However a growing academic literature argues for an interrelation between a broader tax base and a country's economic and democratic development A strand of this literature focuses on the means of taxing the informal sector and argues for positive revenue and growth effects This Palgrave Pivot analyses Paraguay's 2004 and 2012 tax reforms using both qualitative and quantitative data It illustrates that the country's personal income tax as well as other alterations in the tax system constitute an incentive and nudging mechanism that leads to a formalisation process of economic activity and consequently to a broader tax base Using interview and tax data the book demonstrates how the reform initiates a rising demand of formalised purchases from both customers and businesses It further suggests a potential way of how the

Tax Expenditure Management Mark Burton,Kerrie Sadiq,2013-02-14 A tax expenditure is a tax break allowed to a taxpayer or group of taxpayers for example by way of concession deduction deferral or exemption The tax expenditure concept as it was first identified was designed to demonstrate the similarity between direct government spending on the one hand and spending through the tax system on the other The identification of benefits provided through the tax system as tax expenditures allows analysts to consider the fiscal significance of those parts of the tax system which do not contribute to the primary purpose of raising revenue Although a seemingly simple concept it has generated a range of complex definitional and practical issues and this book identifies and critically assesses the controversial aspects of tax expenditure and tax expenditure management Introduction to Transfer Pricing Jerome Monsenego,2022-11-22 Transfer pricing refers to the pricing of cross border intercompany transactions Transfer prices influence the tax base of multinational enterprises and thus also the fiscal revenues of the countries where they are doing business The importance of transfer pricing has significantly expanded over time and culminated with the work of the OECD on Base Erosion and Profit Shifting BEPS With the globalisation of business activities the need for States to prevent tax avoidance and the risk of double taxation faced by multinational enterprises transfer pricing has become a key question for multinational enterprises and tax administrations alike Introduction to Transfer Pricing intends at providing a general introduction to the fundamentals of transfer pricing The book is focused on explanations of the principles that apply albeit to various extents in most countries Although the majority of these principles are provided by the OECD the views of other international organisations in particular the United Nations and the European Union are also taken into account Moreover the book illustrates the fundamentals of transfer pricing with

concrete examples based on the structures often used by multinational enterprises when conducting cross border business activities Also included are relevant court cases from a variety of countries Among the issues and topics covered are the following the arm s length principle in theory and practice transfer pricing methods intercompany transactions involving intangibles and financial transactions common types of transfer pricing models cross border business restructurings the substance requirement for transfer pricing purposes attribution of profits to permanent establishments and the prevention and resolution of transfer pricing disputes This second edition was updated based on the 2022 OECD Transfer Pricing Guidelines and the 2021 UN Transfer Pricing Manual
