**Investigating Grammar in Autism Spectrum Disorders** Anna Gavarró, Stephanie Durrleman, 2018-08-21 Autism Spectrum Disorder ASD hereafter is a neurodevelopmental condition characterized by deficits in communicative and social skills The vast majority of research on language in ASD has focused on pragmatic difficulties while less is known about structural aspects of language in this population Work on syntax and phonology is not only sparse but the heterogeneity in these grammatical domains has moreover led to conflicting reports that they are either intact or impaired More remains to be understood about variations in grammatical profiles in ASD as well as the relation of grammar to other cognitive abilities The body of research gathered here increases our understanding of the grammatical strengths and weaknesses in ASD The contributions carefully elucidate the relations between grammar and other areas of cognition as well as unveil the similarities and differences of grammar in ASD compared to other conditions The result is a volume that provides new ways to think about language and communication in ASD and beyond which should be of interest to both linguists and clinicians

**Speech and Audio Coding for Wireless and Network Applications** Bishnu S. Atal, Vladimir Cuperman, Allen Gersho, 2012-12-06 Speech and Audio Coding for Wireless and Network Applications contains 34 chapters loosely grouped into six topical areas The chapters in this volume reflect the progress and present the state of the art in low bit rate speech coding primarily at bit rates from 2.4 kbit/s to 16 kbit/s Together they represent important contributions from leading researchers in the speech coding community Speech and Audio Coding for Wireless and Network Applications contains contributions describing technologies that are under consideration as standards for such applications as digital cellular communications the half rate American and European

coding standards A brief Introduction is followed by a section dedicated to low delay speech coding a research direction which emerged as a result of the CCITT requirement for a universal low delay 16 kbit s speech coding technology and now continues with the objective of achieving toll quality with moderate delay at a rate of 8 kbit s A section on the important topic of speech quality evaluation is then presented This is followed by a section on speech coding for wireless transmission and a section on audio coding which covers not only 7 kHz bandwidth speech but also wideband coding applicable to high fidelity music The book concludes with a section on speech coding for noisy transmission channels followed by a section addressing future research directions Speech and Audio Coding for Wireless and Network Applications presents a cross section of the key contributions in speech and audio coding which have emerged recently For this reason the book is a valuable reference for all researchers and graduate students in the speech coding community

**Developmental Profiles in Autism Spectrum Disorder** Silvia Silleresi,2023-02-15 This book presents the current state of knowledge and recent advances on three topics in research on Autism Spectrum Disorder ASD the debated existence of profiles of abilities the role of bilingualism and the impact of interactive technologies It includes six chapters that cover a review of morphosyntactic and phonological abilities in monolingual and bilingual children on the autism spectrum the relation between extra linguistic factors intellectual abilities severity of autism trait and language skills an experimental study that aims to identify profiles in children with autism and current advances on the use of interactive technologies for assessing and training language abilities in ASD This book will be useful to anyone interested in language acquisition and language development in autism

**The American Psychiatric Publishing Textbook of Forensic Psychiatry** Liza H. Gold,Richard L. Frierson,2017-10-02 The inaugural edition of The American Psychiatric Association Publishing Textbook of Forensic Psychiatry was the first of its kind and subsequent editions have raised the bar earning it a spot as a leading text in this fascinating subspecialty of psychiatry This new third edition is the product of a painstaking and exhaustive revision process that resulted in a significantly expanded and restructured work This edition is a thorough review of the field yet is flexible enough to be useful to a diverse audience Because the topics in and structure of this edition were informed by the American Board of Psychiatry and Neurology s Content Outline for the Certification Examination in Forensic Psychiatry it can be used as a core text during forensic psychiatry fellowship training or as a review text to prepare for the certification or maintenance of certification exam An excellent resource on legal issues in clinical practice the book will also be an invaluable reference for general psychiatrists who frequently encounter complicated forensic issues such as informed consent confidentiality and the physician patient relationship The editors two of the foremost experts in forensic psychiatry faced the challenge of creating a text that accurately and fully reflects the latest advances in both the law and psychiatry while enhancing learning This comprehensive yet accessible volume does just that Every chapter has been revised and 10 new chapters address topics of critical importance presented in a structure that facilitates study The book highlights the American Academy of Psychiatry

and the Law's Landmark Cases in Forensic Psychiatry listing the cases at the beginning of each chapter and highlighting them within the text. This helps readers master the key points in all topic areas while fostering understanding of the impact of the evolution of legal principles in statutory and case law in forensic psychiatry. A new section on criminal justice includes chapters that address evaluations of competencies in the criminal justice system, assessment of criminal responsibility, and the role of psychiatry in death penalty cases. An entire section is devoted to forensic psychiatric issues involving children and adolescents, including general principles of evaluation of juveniles, evaluations of juveniles in civil law, and evaluations of juveniles in the criminal justice system. New and revised chapters address the impact of technology on forensic psychiatry, including neuroimaging, the Internet, and telepsychiatry. The book thoroughly addresses forensic assessments of all kinds and introduces two new and critical chapters on risk assessment of suicide and violence. Finally, an index of Landmark Cases and an extensive subject index provide the foundational knowledge and navigational tools to identify relevant cases and topics quickly and easily. The American Psychiatric Association Publishing Textbook of Forensic Psychiatry takes the reader from fundamental concepts to cutting edge research. Practicing general and forensic psychiatrists, psychiatry residents, and those enrolled in forensic fellowship programs will come to depend on both its accessibility and its rigor.

Video coding standards K.R. Rao, Do Nyeon Kim, Jae Jeong Hwang, 2013-10-07. The requirements for multimedia, especially video and audio communications, increase rapidly in the last two decades in broad areas such as television, entertainment, interactive services, telecommunications, conference, medicine, security, business, traffic, defense, and banking. Video and audio coding standards play most important roles in multimedia communications. In order to meet these requirements, series of video and audio coding standards have been developed, such as MPEG-2, MPEG-4, MPEG-21 for audio and video by ISO/IEC H.26x for video and G.72x for audio by ITU-T. Video Coder-1, VC-1 for video by the Society of Motion Picture and Television Engineers (SMPTE) and RealVideo RV-9 for video by Real Networks. AVS China is the abbreviation for Audio Video Coding Standard of China. This new standard includes four main technical areas, which are systems, video, audio, and digital copyright management (DRM), and some supporting documents such as consistency verification. The second part of the standard, known as AVS1 P2 Video, Jizhun, was approved as the national standard of China in 2006, and several final drafts of the standard have been completed, including AVS1 P1 System Broadcast, AVS1 P2 Video, Zengqiang, AVS1 P3 Audio Double track, AVS1 P3 Audio 5.1, AVS1 P7 Mobile Video, AVS S P2 Video, and AVS S P3 Audio. AVS China provides a technical solution for many applications, such as digital broadcasting, SDTV and HDTV, high density storage media, Internet streaming media, and will be used in the domestic IPTV, satellite, and possibly the cable TV market. Comparing with other coding standards, such as H.264/AVC, the advantages of AVS video standard include similar performance, lower complexity, lower implementation cost, and licensing fees. This standard has attracted great deal of attention from industries related to television, multimedia communications, and even chip manufacturing from around the world. Also, many well-known companies have joined the AVS Group to be Full Members or

Observing Members The 163 members of AVS Group include Texas Instruments TI Co Agilent Technologies Co Ltd Envivio Inc NDS Philips Research East Asia Aisino Corporation LG Alcatel Shanghai Bell Co Ltd Nokia China Investment NCIC Co Ltd Sony China Ltd and Toshiba China Co Ltd as well as some high level universities in China Thus there is a pressing need from the instructors students and engineers for a book dealing with the topic of AVS China and its performance comparisons with similar standards such as H 264 VC 1 and RV 9

*The Evolution of Rhythm Cognition: Timing in Music and Speech* Andrea Ravignani, Henkjan Honing, Sonja A. Kotz, 2018-07-24 Human speech and music share a number of similarities and differences One of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations Human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech However a number of critical questions remain to be answered Where does this human sensitivity for rhythm arise How did rhythm cognition develop in human evolution How did environmental rhythms affect the evolution of brain rhythms Which rhythm specific neural circuits are shared between speech and music or even with other domains Evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives First empirical observations of music and speech in the field are contrasted and generate testable hypotheses Experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm Finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution Our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing However researchers in different fields often work on parallel potentially converging strands with little mutual awareness This research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process It includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons of rhythm processing in music and speech e g behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e g connectionist symbolic models of rhythmicity as an evolved behavior

**Heritage Languages at the Crossroads: Cultural Contexts, Individual Differences, and Methodologies** Brechje Antonet Van Osch, Alicia Luque, Jason Rothman, Selim Tiryakioğlu, Nadine Kolb, 2025-02-10 This Research Topic focuses on heritage languages at the crossroads by approaching heritage language bilingualism in an

interdisciplinary way A language qualifies as a heritage language if it is a minority language spoken at home in a majority language context Any language can be the societal majority language in one context and the heritage language in another While the number of empirical studies on language acquisition and processing in heritage language bilingualism has increased in recent years heritage language bilinguals are an understudied subgroup of bilinguals When examined as adults heritage speaker bilinguals tend to show significant differences in their heritage language performance use and competence grammatical knowledge from one another This variation is particularly unusual because heritage speakers like monolinguals are native speakers of the heritage language

**Assessing Adolescent and Adult Intelligence** Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III Assessing Adolescent and Adult Intelligence the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III Augmenting the traditional sequential and simultaneous WAIS III interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students

**Learning a non-native language in a naturalistic environment: Insights from behavioural and neuroimaging research** Christos Pliatsikas, Vicky Chondrogianni, 2015-09-02 It is largely accepted in the relevant literature that successful learning of one or more non native languages is affected by a number of factors that are independent of the target language's per se these factors include the age of acquisition AoA of the target language's the type and amount of formal instruction the learners have received as well as the amount of language use that the learners demonstrate Recent experimental evidence suggests that one crucial factor for efficient native like performance in the non native language is the amount of naturalistic exposure or immersion that the learners receive to that language This can be broadly defined as the degree to which language learners use their non native language outside the classroom and for their day to day activities and usually presupposes that the

learners live in an environment where their non native language is exclusively or mostly used Existing literature has suggested that linguistic immersion can be beneficial for lexical and semantic acquisition in a non native language as well as for non native morphological and syntactic processing More recent evidence has also suggested that naturalistic learning of a non native language can also have an impact on the patterns of brain activity underlying language processing as well as on the structure of brain regions that are involved expressed as changes in the grey matter structure This Research Topic brings together studies on the effects of learning and speaking a non native language in a naturalistic environment These include more efficient or native like processing in behavioural tasks tapping on language lexicon morphology syntax as well as changes in the brain structure and function as revealed by neuroimaging studies
