International Research on Education for Sustainable Development in Early Childhood John

Siraj-Blatchford, Cathy Mogharreban, Eunhye Park, 2016-10-14 This book offers a perspective on Education for Sustainable Development in Early Childhood ESDEC that is far removed from the business as usual notion of an extended predominantly environmental educational curriculum for preschools It presents a vision of sustainable development that has relevance to Early Childhood Care and Education ECCE from birth to school it is relevant as much to homes family support and health settings as it is to educational settings and is as much concerned with health and wellbeing as with education The book provides a perspective that is fundamentally embedded in notions of interdependency It places an emphasis upon the importance of recognising the interdependency of peoples within and between nation states the ecological interdependencies of the natural world of humanity and nature and most significantly the interdependency of adults and children These emphases have their origins in the grassroots studies included in the ten chapters representing countries from around the world The book reflects the idea that only global solutions and initiatives are capable of addressing the global challenges of climate change environmental pollution and global threats to ecological systems and biodiversity
