the outset it too was interested in history as a form of objective knowledge Many of sociology's founders believed that by retracing historical processes they could make a clean break with abstraction and metaphysics For their part historians generally remained hostile to any kind of systematization And yet at the end of the 19th century the science of history would draw some valuable lessons from the emerging methodology of sociology It was in large part under the impetus of the issues and problems raised by the philosopher Henri Berr and by the Durkheimian School with the economist François Simiand as its lead protagonist that the community of historians increasingly aware of the limits of narrative history turned so enthusiastically to social and economic history just as Durkheim and his disciples consulted history in order to avoid the twin pitfalls of the philosophy of history and of introspective psychology History and Sociology in France focuses on this dialogue of the two neighboring sciences
