Brock, 2010-09-03 The first years of the company that developed the microchip and created the model for a successful Silicon Valley start up In the first three and a half years of its existence Fairchild Semiconductor developed produced and marketed the device that would become the fundamental building block of the digital world the microchip Founded in 1957 by eight former employees of the Shockley Semiconductor Laboratory Fairchild created the model for a successful Silicon Valley start up intense activity with a common goal close collaboration and a quick path to the market Fairchild's first device hit the market just ten months after the company's founding Fairchild Semiconductor was one of the

first companies financed by venture capital and its success inspired the establishment of venture capital firms in the San Francisco Bay area. These firms would finance the explosive growth of Silicon Valley over the next several decades. This history of the early years of Fairchild Semiconductor examines the technological, business, and social dynamics behind its innovative products. The centerpiece of the book is a collection of documents reproduced in facsimile, including the company's first prospectus, ideas, sketches, and plans for the company's products, and a notebook kept by cofounder Jay Last that records problems, schedules, and tasks discussed at weekly meetings. A historical overview, interpretive essays, and an introduction to semiconductor technology in the period accompany these primary documents.
