Provides readers with basic, intermediate and advanced mobile forensic concepts and methodology. Thirty overall chapters which include such topics as preventing evidence contamination, triaging devices, troubleshooting, report writing, physical memory and encoding, date and time stamps, decoding Multi Media Messages, decoding unsupported application data, advanced validation, water damaged phones, Joint Test Action Group (JTAG), Thermal and Non Thermal chip removal, BGA cleaning and imaging, In System Programming, ISP and more. Popular JTAG boxes Z3X and RIFF RIFF2 are expanded on in detail. Readers have access to the companion guide which includes additional image examples and other useful materials.

Forensic Science Under Siege Kelly Pyrek, 2010-07-27. Forensic science laboratories' reputations have increasingly come under fire. Incidents of tainted evidence, false reports, allegations of negligence, scientifically flawed testimony or worse yet perjury in court testimony have all served to cast a shadow over the forensic sciences. Instances of each are just a few of the quality related charges made in the last few years. *Forensic Science Under Siege* is the first book to integrate and explain these problematic trends in forensic science. The issues are timely and are approached from an investigatory yet scholarly and research driven perspective. Leading experts are consulted and interviewed including directors of highly visible forensic laboratories as well as medical examiners and coroners who are commandeering the discussions related to these issues. Interviewees include Henry Lee, Richard Saferstein, Cyril Wecht and many others. The ultimate consequences of all these pressures as well as the future of forensic science has yet to be determined. This book examines these challenges while also exploring possible solutions such as the formation of a forensic science consortium to address specific legislative issues. It is a must read for all forensic scientists. Provides insight on the current state of forensic science demands and future direction as provided by leading experts in the field. Consolidates the current state of standards and best practices of labs across disciplines. Discusses a controversial topic that must be addressed for political support and financial funding of forensic science to improve.
