Urban Political Ecology in the Anthro-obscene Henrik Ernstson,Erik

Swyngedouw, 2018-12-07 *Urban Political Ecology in the Anthropocene: Interruptions and Possibilities* centres on how to organize anew the articulation between emancipatory theory and political activism. Across its theoretical and empirical chapters written by leading scholars from anthropology, geography, urban studies and political science, the book explores new political possibilities that are opening up in an age marked by proliferating contestations, sharpening socio-ecological inequalities and planetary processes of urbanization and environmental change. A deepened conversation between urban environmental studies and political theory is mobilized to chart a radically new direction for the field of urban political ecology and cognate disciplines. What could emancipatory politics be about in our time? What does a return of the political under the aegis of equality and freedom signal today in theory and in practice? How do political movements emerge that could reinvent equality and freedom as actually existing socio-ecological practices? The hope is to contribute discussions that can expand and rearrange critical environmental studies to remain relevant in a time of deepening depoliticization and the rise of post-truth politics. *Urban Political Ecology in the Anthropocene* will be of interest to postgraduates, established scholars and upper-level undergraduates from any discipline or field with an interest in the interface between the urban, the environment and the political, including geography, urban studies, environmental studies and political science. *The Fires Beneath*

Seán Morrow, 2016-06-01 *The life of Monica Wilson* is a story of groundbreaking scholarship, passionate creativity and personal tragedy during South Africa's bitter and divided twentieth century. As a young anthropologist in the 1930s, Monica immersed herself in the lives, work and beliefs of African communities in southern and East Africa while carefully observing the effects of historical change. At the core of her existence was her intellectual collaboration and intense personal relationship with her husband, the brilliant but clinically depressive Godfrey Wilson, who took his own life in 1944. After Godfrey's death, Monica raised their two children and built a career as a leading academic at Fort Hare, Rhodes University, College and the University of Cape Town. In a political environment where black academics were under constant threat and ideas were censored, she outspokenly advocated racial equality and freedom of speech; her publications emphasising a common South African identity and implicitly challenging apartheid's separate development. This fascinating biography moves between the Eastern Cape, Cambridge, Tanganyika, Nyasaland, Northern Rhodesia and Cape Town. It explores the relationship between anthropology and history and the tensions between liberalism, Christianity, Marxism and apartheid ideology. Drawing on the letters and diaries left by Monica and Godfrey Wilson, this is a powerful story about politics, race, war, faith, love and loss.

*Making Music, Making Society* Josep Martí, Sara Revilla, 2018-01-23 A society is the result of interacting individuals and individuals are also the result of this interaction. This interaction happens through music among other factors. As such, music constitutes a powerful resource for symbolic interaction, which constitutes the medium and substance of a culture. The importance of music in a society is clearly brought to light in the role that it plays in the three basic parameters of the social logics: identity, social order and the need for exchange. If music is so important to us, it is because apart from its assigned

aesthetic values it fits closely with the dynamics of each of these three different parameters These parameters which are consubstantial to the social nature of the human being constitute the core of the book as they manifest in musical practices This publication addresses important issues such as the role of music in shaping identities how music and social order are intertwined and why music is so relevant in human interaction The last part of the book explores issues related to the social application of musical research The volume brings together specialists from different academic disciplines with the same powerful starting point music is not merely something related to the social but rather a social life itself something capable of structuring the social experience

**Small Carnivores** Emmanuel Do Linh San, Jun J. Sato, Jerrold L. Belant, Michael J. Somers, 2022-07-25 Small Carnivores Evolution Ecology Behaviour and Conservation This book focuses on the 232 species of the mammalian Order Carnivora with an average body mass 21.5 kg Small carnivores inhabit virtually all of the Earth's ecosystems adopting terrestrial semi fossorial semi arboreal or semi aquatic lifestyles They occupy multiple trophic levels and therefore play important roles in the regulation of ecosystems such as natural pest control seed dispersal and nutrient cycling In areas where humans have extirpated large carnivores small carnivores may become the dominant predators which may increase their abundance mesopredator release to the point that they can sometimes destabilize communities drive local extirpations and reduce overall biodiversity On the other hand one third of the world's small carnivores are threatened or near threatened with extinction This results from regionally burgeoning human populations industrial and agricultural activities causing habitat reduction destruction fragmentation and pollution Overexploitation persecution and the impacts of introduced predators competitors and pathogens have also negatively affected many small carnivore species Although small carnivores have been intensively studied over the past decades bibliometric studies showed that they have not received the same attention given to large carnivores Furthermore there is huge disparity in how research efforts on small carnivores have been distributed with some species intensively studied and others superficially or not at all This book aims at filling a gap in the scientific literature by elucidating the important roles of and documenting the latest knowledge on the world's small carnivores pThis is a book that has been needed for decades It is the first compendium of recent research on a group of mammals which has received almost no attention before the early 1970s This book covers a wide range of subdisciplines and techniques and should be considered a solid baseline for further research on this little known group of highly interesting mammals As our knowledge regarding how ecosystems function increases then the valuable role of small carnivores and the necessity for their conservation should be regarded as of paramount importance The topics covered in this book should therefore be of great interest not only to academics and wildlife researchers but also to the interested layman
