David Foster, 2017-10-03 Despite the increasingly global implications of conversations about writing and learning U S composition studies has devoted little attention to cross national perspectives on student writing and its roles in wider cultural contexts Caught up in our own concerns about how U S students make the transition as writers from secondary school to postsecondary education we often overlook the fact that students around the world are undergoing the same evolution How do the students in China England France Germany Kenya or South Africa the educational systems represented in this collection write their way into the communities of their chosen disciplines How for instance do students whose mother tongue is not the language of instruction cope with the demands of academic and discipline specific writing And in what ways is U S students development as academic writers similar to or different from that of students in other countries With this collection editors David Foster and David R Russell broaden the discussion about the role of writing in various educational systems and cultures Students development as academic writers raises issues of student authorship and agency as well as larger issues of educational access institutional power relations system goals and students roles in society The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system describe students agency as writers and identify contextual factors social economic linguistic cultural that shape institutional responses to writing development In discussions that bookend these studies of different educational structures the editors compare U S postsecondary writing practices and pedagogies with those in other national systems and suggest new perspectives for cross national study of learning writing issues important to all educational systems Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations the insights offered here and the call for further studies are especially welcome and timely *A History of Global Capitalism*

Sambit Bhattacharyya, 2020-10-31 The book sets out to explore the economic motivations of imperial expansion under capitalism This undoubtedly is related to two fundamental research questions in economic sciences First what factors explain the divergence in living standards across countries under the capitalist economic system Second what ensures internal and external stability of the capitalist economic system The book adopts a unified approach to address these questions Using the standard growth model it shows that improvements in living standards are dependent on access to raw materials labour capital technology and perhaps most importantly economies of scale Empires ensure scale economy through guaranteed access to markets and raw materials The stability of the system depends on growth and distribution and it is not possible to have one without the other However the quest for growth and imperial expansion implies that one empire invariably comes into conflict with another This is perhaps the most unstable and potentially dangerous characteristic of the capitalist system Using extensive historical accounts the book shows that this inherent tension can be best managed by acknowledging mutual spheres of influence within the international system along the lines of the 1815 Vienna Congress This timely publication addresses not only students and scholars of economics geography political science and history but also general readers

interested in a better understanding of economic development international relations and the history of global capitalism
