Donahue, 2010-12-01 Everybody knows federal agencies are brain dead leviathans Everybody knows that the watchword of federal management is that s the way we ve always done it Everybody knows that any creativity within American government shows up only in the cities and states Everybody s wrong In 1995 the Ford Foundation s annual Innovation in American Government award competition was opened up to federal candidates and a third of the winners since then have been federal institutions This book profiles the 14 federal award winners from 1995 to 1998 and challenges the conventional wisdom about the federal bureaucracy s capacity to adapt Examples include the Consumer Product Safety Commission which figured out how to identify and act upon business and government s shared stake in keeping dangerous products out of consumers hands and the Wage and Hour inspectors in the Labor Department who deployed market leverage to put pressure on the garment industry scofflaws whose sweatshops had evaded conventional enforcement The stories show how pressure promises and professional pride can galvanize federal managers and front line workers to overcome what are admittedly imposing impediments to change and persevere with new ways to deliver on their missions And they illustrate the unfashionable truth that innovation is within Washington s repertoire after all Copublished with the Council for Excellence in Government

USA in Decline David J. Phillips, 2008-12 The US and its citizens are addicted to debt much as a drug addict is hooked on heroin Unless the US achieves rehabilitation this failing alone will ensure that the USA will continue to decline relative to many other countries Liberals are now firmly in control in the USA In this political climate there is no indication that our debt will not continue to increase dramatically The modus operandi is to give a short term fix to all problems by dramatically increasing debt The present financial crisis itself caused by excessive debt is being fixed by even more debt The burden for the few who pay taxes will become increasingly onerous and increasingly unacceptable for future generations The best and the brightest will turn away from the USA increasing the US relative rate of decline Much that has been achieved in the USA since the end of the Second World War has been achieved by people not born in the USA In future the USA increasingly will not be the destination of choice for people with the most to offer Instead it is the destination for illegal immigrants at the other end of the social scale The USA is considered ugly by the rest of the world because it makes no effort to control its gluttony In the USA 25% of the world s energy is consumed by 5% of the world population The USA also leads the world in obesity and in debt The USA does not pay for its insatiable consumption Despite its great opportunities the USA has a high percentage of free loaders who pay little or no income taxes They have become home owners through debt that they have not worked and saved to afford through policies of US Liberal government The ensuing tsunami is now engulfing the less fortunate people throughout the world who are genuinely poor and are now having to suffer the consequences of our worthless paper debt instruments while the USA takes on huge new debt to continue to feed its addiction instead of facing up

to the reality of living within its means *Hearings* United States. Congress. Senate. Committee on Labor and Public Welfare, 1959 **Work, Mobility, and Participation** Robert E. Cole, 2024-06-28 At a minimum our goal is to develop a better understanding of Japanese labor market practices and work organization and in so doing develop a more enlightened vision of American practices We will greatly enhance our ability to achieve both these goals by arriving at a better understanding of the comparative experience of the two nations over time We can no longer afford the delusion that what exists in the United States reflects the characteristics of industrial society in its most advanced form Yet to follow current fashion in simply denying that the United States is the very model of a modern society while advocating that we imitate the Japanese is to take a course filled with its own pitfalls Perhaps it is time we accepted the fact that the social scientist's intense commitment to generalization cannot be allowed to obscure the fundamental observation that nations develop along their own paths based on their own political cultural economic and social histories As nations industrialize there is undoubtedly convergence in important institutional spheres such as the expansion of education the adoption of common technologies and determinants of labor mobility Certainly nations can learn from one another and indeed some nations impose their will on other nations Yet there are also unique solutions to common problems From the Introduction This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979
