 Uncertainty is a fundamental characteristic of weather seasonal climate and hydrological prediction and no forecast is complete without a description of its uncertainty Effective communication of uncertainty helps people better understand the likelihood of a particular event and improves their ability to make decisions based on the forecast Nonetheless for decades users of these forecasts have been conditioned to receive incomplete information about uncertainty They have become used to single valued deterministic forecasts e g the high temperature will be 70 degrees Farenheit 9 days from now and applied their own experience in determining how much confidence to place in the forecast Most forecast products from the public and private sectors including those from the National Oceanographic and Atmospheric Administration s National Weather Service continue this deterministic legacy Fortunately the National Weather Service and others in the prediction community have recognized the need to view uncertainty as a fundamental part of forecasts By partnering with other segments of the community to understand user needs generate relevant and rich informational products and utilize effective communication vehicles the National Weather Service can take a leading role in the transition to widespread effective incorporation of uncertainty information into predictions Completing the Forecast makes recommendations to the National Weather Service and the broader prediction community on how to make this transition *Proceedings* , **Bulletin** ,1984 **Soil Survey Techniques** Gary W. Petersen,1987 Video image analysis of large scale vertical aerial photography to facilitate soil mapping Using ground penetrating radar to increase the quality and efficiency of soil surveys Microcomputer processing and analysis of pedon descriptions Computer assisted writing its application in soil survey manuscripts The microcomputer a valuable tool for field soil survey Describing surface soil properties their seasonal changes and implications for management Use of slope aspect and elevation maps derived from digital elevation model data in making soil surveys Using a spatial and tabular database to generate statistics from terrain and spectral data for soil surveys **Limited Scientific and Technical Aerospace Reports** ,1972 **Status of Air Traffic Control System** United States.
