Artificial Neural Nets and Genetic Algorithms David W. Pearson, Nigel C. Steele, Rudolf Albrecht, 2011-06-28 The 2003 edition of ICANNGA marks a milestone in this conference series because it is the tenth year of its existence The series began in 1993 with the inaugural conference at Innsbruck in Austria At that first conference the organisers decided to organise a similar scientific meeting every two years As a result conferences were organised at Ales in France 1995 Norwich in England 1997 Portoroz in Slovenia 1999 and Prague in the Czech Republic 2001 It is a great honour that the conference is taking place in France for the second time Each edition of ICANNGA has been special and had its own character Not only that participants have been able to sample the life and local culture in five different European countries Originally limited to neural networks and genetic algorithms the conference has broadened its outlook over the past ten years and now includes papers on soft computing and artificial intelligence in general This is one of the reasons why the reader will find papers on fuzzy logic and various other topics not directly related to neural networks or genetic algorithms included in these proceedings We have however kept the same name International Conference on Artificial Neural Networks and Genetic Algorithms All of the papers were sorted into one of six principal categories neural network theory neural network applications genetic algorithm and evolutionary computation theory genetic algorithm and evolutionary computation applications fuzzy and soft computing theory fuzzy and soft computing applications

Nature-Inspired Networking Phan Cong-Vinh, 2018-02-13 Nature inspired

includes roughly speaking bio inspired physical inspired social inspired and so on This book contains highly original contributions about how nature is going to shape networking systems of the future Hence it focuses on rigorous approaches and cutting edge solutions which encompass three classes of major methods 1 Those that take inspiration from nature for the development of novel problem solving techniques 2 Those that are based on the use of networks to synthesize natural phenomena and 3 Those that employ natural materials to compute or communicate Combinatorial Optimization Problems in Planning and Decision Making Michael Z. Zgurovsky, Alexander A. Pavlov, 2018-09-24 The book focuses on the next fields of computer science combinatorial optimization scheduling theory decision theory and computer aided production management systems It also offers a quick introduction into the theory of PSC algorithms which are a new class of efficient methods for intractable problems of combinatorial optimization A PSC algorithm is an algorithm which includes sufficient conditions of a feasible solution optimality for which their checking can be implemented only at the stage of a feasible solution construction and this construction is carried out by a polynomial algorithm the first polynomial component of the PSC algorithm an approximation algorithm with polynomial complexity the second polynomial component of the PSC algorithm also for NP hard combinatorial optimization problems an exact subalgorithm if sufficient conditions were found fulfilment of which during the algorithm execution turns it into a polynomial complexity algorithm Practitioners and software developers will find the book useful for implementing advanced methods of production organization in the fields of planning including operative planning and decision making Scientists graduate and master students or system engineers who are interested in problems of combinatorial optimization decision making with poorly formalized overall goals or a multiple regression construction will benefit from this book *Dissertation Abstracts International*, 2006 **Proceedings of the 6th International Asia Conference on Industrial Engineering and Management Innovation** Ershi Qi, 2015-10-12 The 6th International Asia Conference on Industrial Engineering and Management Innovation is sponsored by the Chinese Industrial Engineering Institution and organized by Tianjin University The conference aims to share and disseminate information on the most recent and relevant researches theories and practices in industrial and system engineering to promote their development and application in university and enterprises **Resources in Education**, 2001-04 **Evolvable Machines** Nadia Nedjah, Luiza de Macedo Mourelle, 2006-06-23 Methods for the artificial evolution of active components such as programs and hardware are rapidly developing branches of adaptive computation and adaptive engineering Evolvable Machines reports innovative and significant progress in automatic and evolutionary methodology applied to machine design This book presents theoretical as well as practical chapters concentrating on Evolvable Robots Evolvable Hardware Synthesis as well as Evolvable Design *Spectrum and Power Allocation in Cognitive Radio Systems* Suriyan, Kannadhasan, R., Dhaya, Nagarajan, R., Karthick, Alagar, 2024-08-06 As wireless services rapidly expand the inefficient use of limited spectrum resources poses a critical challenge The conventional approach to spectrum allocation based on fixed assignments could be

more effective in meeting the escalating demand for wireless devices and systems Cognitive radio technology offers a transformative solution by reimagining the spectrum as a multidimensional space enabling opportunistic access to underutilized bands However the field of cognitive radio is still in its early stages needing more in depth analyses and descriptions of crucial processes Spectrum and Power Allocation in Cognitive Radio Systems addresses this pressing need by offering a comprehensive guide for academic scholars researchers and industry professionals This book delves into cognitive radio technology s foundations organization and challenges providing insights into dynamic spectrum access networking protocols hardware architecture and emerging applications It presents advanced topics such as spectrum sensing algorithms cooperative spectrum sensing and multi user access offering practical solutions to enhance spectrum efficiency
