America Ascendant Stanley B. Greenberg,2015-11-03 Renowned pollster who was key advisor to President Clinton Stanley Greenberg reveals how America will be ascendant and how new Democratic presidents can lead a new era of bold reform *Growing Community Forests* Ryan Bullock,Gayle Broad,Lynn Palmer,M.A. (Peggy) Smith,2017-10-13 Canada is experiencing an unparalleled crisis involving forests and communities across the country While municipalities policy makers and industry leaders acknowledge common challenges such as an overdependence on US markets rising energy costs and lack of diversification no common set of solutions has been developed and implemented Ongoing and at times contentious public debate has revealed an appetite and need for a fundamental rethinking of the relationships that link our communities governments industrial partners and forests towards a more sustainable future The creation of community forests is one path that promises to build resilience in forest communities and ecosystems This model provides local control over common forest lands in order to activate resource development opportunities benefits and social responsibilities Implementing community forestry in practice has proven to be a complex task however there are no road maps or well developed and widely tested models for community forestry in Canada But in settings where community forests have taken hold there is a rich and growing body of experience to draw on The contributors to *Growing Community Forests* include leading researchers practitioners Indigenous representatives government representatives local advocates and students who are actively engaged in sharing experiences resources and tools of significance to forest resource communities policy makers and industry

Practising Cultural Geographies Ravi S. Singh,Bharat Dahiya,Arun K. Singh,Padma C. Poudel,2022-05-20 This festschrift honours Prof Rana P B Singh who has dedicated his life to teaching and conducting research on cultural geography with a dweller Indian perspective The book focuses on the cultural geographies of India and to an extent that of

South Asia It is a rich collection of 23 essays on the themes apprised by him covering landscapes religion heritage pilgrimage and tourism and human settlements **Asia in International Relations** Pinar Bilgin,L.H.M. Ling,2017-02-01 Asia in International Relations decolonizes conventional understandings and representations of Asia in International Relations IR This book opens by including all those geographical and cultural linkages that constitute Asia today but are generally ignored by mainstream IR Covering the Indian subcontinent Turkey the Mediterranean Iran the Arab world Ethiopia and Central Northeast Southeast Asia the volume draws on rich literatures to develop our understanding of power relations in the world s largest continent Contributors de colonize de imperialize and de Cold War the region to articulate an alternative narrative about Asia world politics and IR This approach reframes old problems in new ways with the possibility of transforming them rather than recycling the same old approaches with the same old intractable outcomes **Redesigning Manufacturing** M. Beverland,B. Nielsen,V. Pryce,Ellen Hellmann,2015-05-13 Manufacturing in the UK has an image problem Although this image problem is more fiction than fact it nonetheless has an impact on the sector s ability to attract staff capital and policy interest This book redresses this situation by focusing on the real successes of the sector and the strategies used by makers to achieve sustainable results *The Complacent Class* Tyler Cowen,2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen s blog Marginal Revolution is the first thing I read every morning And his brilliant new book *The Complacent Class* has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we re working harder than ever to avoid change We re moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We re more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and decreased incentives to innovate and create *The Complacent Class* argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again *Transport Justice* Karel Martens,2016-07-01 Transport Justice develops a new paradigm for transportation planning

based on principles of justice Author Karel Martens starts from the observation that for the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it without much attention being paid to the persons actually using or failing to use that transport system There are far reaching consequences of this approach with some enjoying the fruits of the improvements in the transport system while others have experienced a substantial deterioration in their situation The growing body of academic evidence on the resulting disparities in mobility and accessibility have been paralleled by increasingly vocal calls for policy changes to address the inequities that have developed over time Drawing on philosophies of social justice Transport Justice argues that governments have the fundamental duty of providing virtually every person with adequate transportation and thus of mitigating the social disparities that have been created over the past decades Critical reading for transport planners and students of transportation planning this book develops a new approach to transportation planning that takes people as its starting point and justice as its end

Handbook on the Geographies of Money and Finance Ron Martin, Jane Pollard, 2017-03-31 The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development *Asymmetric Crisis in Europe and Possible Futures* Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and

European politics *Maritime Mobilities* Jason Monios, Gordon Wilmsmeier, 2017-12-01 The central concerns of mobilities research exploring the broader context and human aspects of movement are fundamental to an understanding of the maritime freight transport sector Challenges to the environment attempts at more sustainable practices changes in the geoeconomic system political power labour economic development and governance issues are all among the topics covered in this book The aim of this volume is to address issues of maritime transport not only in the simple context of movement but within the mobilities paradigm The goal is to examine negative system effects caused by blockages and inefficiencies examine delays and wastage of resources identify negative externalities explore power relations and identify the winners and losers in the globalised trade system with a particular focus on the maritime network *Maritime Mobilities* therefore aims to build a bridge between traditional maritime academic approaches and the mobilities paradigm This volume is of great importance to those who study industrial economics shipping industries and transport geography *Advances in Urbanism, Smart Cities, and Sustainability* Uday Chatterjee, Arindam Biswas, Jenia Mukherjee, Sushobhan Majumdar, 2022-04-20 While technology is developing at a fast pace urban planners and cities are still behind in finding effective ways to use technology to address citizen s needs Multiple aspects of sustainable urbanism are brought together in this book along with advanced technologies and their connections to urban planning and management It integrates urban studies smart cities AI IoT remote sensing and GIS Highlights include land use planning spatial planning and ecosystem based information to improve economic opportunities Urban planners and engineers will understand the use of AI in disaster management and the use of GIS in finding suitable landfill sites for sustainable waste management Features Explains the process of urban heritage conservation including the process of urban renewal and its regeneration and the role of citizens in urban renewal planning and management Includes several case studies highlighting urban environmental problems and challenges in developed and developing countries and the ways for converting urban areas into smart cities Focuses on urban resources the supply of energy in smart cities and their proper management practices Introduces the role of remote sensing GIS and IoT in making a smart city and meeting sustainable goals Analyzes unique case studies their challenges and obstacles and proposes a set of factors to understanding smart city initiatives and projects *A University Education* David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher

education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework
