Red, White, and Black Robert L. Woodson, Sr., 2021-05-11 In the rush to redefine the place of black Americans in contemporary society many radical activists and academics have mounted a campaign to destroy traditional American history and replace it with a politicized version that few would recognize According to the new radical orthodoxy the United States was founded as a racist nation and everything that has happened throughout our history must be viewed through the lens of the systemic oppression of black people Rejecting this false narrative a collection of the most prominent and respected black scholars and thinkers has come together to correct the record and tell the true story of black Americans in all its complexity diversity of experience and poignancy Collectively they paint a vivid picture of black people living the grand American experience however bumpy the road may be along the way But rather than a people apart blacks are woven into the united whole that makes this nation unique in history Featuring Essays by John Sibley Butler Jason D Hill Coleman Cruz Hughes John McWhorter Clarence Page Wilfred Reilly Shelby Steele Carol M Swain Dean Nelson Charles Love Rev Corey Brook Stephen L Harris Harold A Black Stephanie Deutsch Yaya J Fanusie Ian Rowe John Wood Jr Joshua Mitchell Robert Cherry Rev DeForest Black Soaries Jr *The Drone Memos* Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In *The Drone Memos* civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of *The Nation* **Economic Aspects of Genocides, Other Mass Atrocities, and Their Prevention** Charles H. Anderton, Jurgan Brauer, 2016-05-09 Alongside other types of mass atrocities genocide has received extensive scholarly policy and practitioner attention Missing however is the contribution of economists to better understand and prevent such crimes This edited collection by 41 accomplished scholars examines economic aspects of genocides other mass atrocities and their prevention Chapters include numerous case studies e g California s Yana people Australia s Aborigines peoples Stalin s killing of Ukrainians Belarus the Holocaust Rwanda DR Congo Indonesia Pakistan Colombia Mexico s drug wars and the targeting of suspects during the Vietnam war probing literature reviews and completely novel

[The Geography of Injustice](#) Barak Kushner,2024-03-15 In The Geography of Injustice Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan s empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history [Union Catalog of Serials Currently Received in the Libraries of the University of Wisconsin--Madison](#)

Urban Development in China under the

Institution of Land Rights Jieming Zhu,2019-09-17 How have the development and redevelopment of China s cities since the early 1950s transformed the settlements and fortunes of a fifth of the world s population Rapid urbanization since the 1980s has changed the nation from a rural society to an urban one marking it as one of the most significant transformations in history As a country with severe land scarcity land resources are intensively contested for during urbanization under the new regime of marketization This book focuses on the impact of the institution of land rights that have transitioned from private ownership to socialist state ownership and subsequently to public land leasing in the urban domain and to collective ownership in rural areas In the context of defining the relationship between the state and the market the gradualist transition of land rights gives rise to intriguing processes of place making The elaboration of these processes will engage several revealing conceptual notions land as a means of production land commodification ambiguous land rights incomplete land rights trading land use rights for land development rights institutional uncertainty land rent seeking and dissipating local developmental state danwei enterprises and more The newly created landed interests are embedded intricately within the urban spatial structure This book would especially be of interest to scholars interested in developmental economics urban planning geography public policies public management and sociology and also practitioners focusing on development and planning

The Challenges for Russia's Politicized Economic System Susanne Oxenstierna,2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market

and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction. The book provides an in-depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied. *Ecosystem Geography* Robert G. Bailey, 2014-07-08 and management is presently undergoing enormous change away from managing single resources to managing ecosystems. From forest to tundra to desert to steppe the world's ecosystems vary vastly. To manage them effectively we need to understand their geographic distribution better. We need to do this at various levels of detail because ecosystems exist at multiple scales in a hierarchy from regional to local. Maps are needed to display ecosystem distribution and hierarchy. Until now information on defining ecosystem boundaries has been scarce. This book is the first to clarify and systematize the underlying principles for their mapping. It presents a synthesis of the knowledge in this field and provides a guide to its use. I recommend this book to all who are involved in the study and management of ecosystems. Chief USDA Forest Service Jack Ward Thomas v Preface to the Second Edition. This book outlines a system that organizes the Earth into a hierarchy of increasingly finer scale ecosystems that can serve as a consistent framework for ecological analysis and management. The system consists of a three-level hierarchy of nested ecosystem units and their associated mapping criteria. Delineation of units involves identifying the environmental factors controlling the spatial geography of ecosystems at various levels and establishing boundaries where these factors change significantly. Macroscale units, ecoregions, are climatically controlled and delineated as Köppen-Trewartha climate zones. *The Politics of Energy Security* Johannes Kester, 2018-06-12. Energy security is known for its slippery nature and subsequent broad range of definitions. Instead of another attempt to grasp its essence, this book offers a critical reflection that problematizes the use of energy security itself. After a short historical and methodological analysis of the proliferation of energy security, *The Politics of Energy Security* unpacks three social practices that drive energy security. These include an analysis of the logics of security, a study of the relation between the materiality of sociotechnical energy systems and the knowledge people have over such systems, and a reflection on the power and politics behind energy security. Each of these is discussed and ultimately illustrated in the last chapter to show how energy security works, how it is shaped, and what role it plays within political processes. Based on a novel performative reading of energy security with its focus on ontological politics and an in-depth look at the often implicitly accepted social practices that determine how people shape and are shaped by energy security, this book will be of great interest to students and scholars of energy security and policy, political theory, international relations, critical security studies, and environmental studies more broadly.
