Geography Paper 1 2014 Term 3 Limpopo:

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South. All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South. *Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects* Intergovernmental Panel on Climate Change (IPCC), 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) will again form the standard reference for all those concerned with climate change and its consequences including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy. **Climate Change and Rainfall Extremes in Africa** Victor Ongoma, 2025-04-21 Climate Change and Rainfall Extremes in Africa: Occurrence, Impacts and Adaptation provides the latest developments on extreme rainfall in Africa along with an analysis of current impacts, future implications and community adaptations. The book's chapters are organized into three parts: 1. Understanding Rainfall Extremes, 2. Regional Rainfall and Hydrological Extremes, and 3. Prediction, Impacts and Adaptation to Rainfall Extremes. Specific sections examine rainfall variability in Africa and across the world, how climate change has contributed to the increasing severity of events, focus on different regions and various meteorological extremes including tropical cyclones, drought, flooding, rising water levels and changes in rainfall concentration. Final sections look ahead to the future of forecasting rainfall, economic implications, damage assessment, adaptation, community resilience and risk reduction measures. This timely resource will deepen readers' understanding of how climate change and extreme rainfall in Africa and elsewhere are impacting communities and what can be done to mitigate the effects. Provides a conceptual framework that gives readers an interdisciplinary understanding of climate change and rainfall extremes in Africa. Includes case studies that offer practical examples and real world data. Presents end of chapter summaries that highlight findings and future implications. **From Local to Global** Taylor A. Foerster, John L. Koprowski, Matthew M. Mars, 2024-06-07 From Local to Global provides a timely and relevant discussion and exploration of entrepreneurial topics, their impact and ties to key values in today's society such as social, environmental and economic issues and challenges. **Traditional and Indigenous Knowledge for the Modern Era** David R. Katerere, Wendy Applequist, Oluwaseyi M. Aboyade, Chamunorwa Togo, 2019-09-05 While there is talk of the Fourth Industrial Revolution, old and new challenges bedevil the world: climate change, nutrition and health, poverty being at the top of the list.

In seeking solutions to these and other problems which afflict the modern era it is worthwhile to look into our collective past to the traditions and knowledges of our ancestors. Such knowledge continues to exist in many parts of the world though now marginalized by homogenous Eurocentric ontology and epistemology. This book presents a compilation of reviews, case studies and primary research attempting to locate the utility of traditional and Indigenous Knowledges in an increasingly complex world. It assembles chapter authors from across the world to tackle topics ranging from traditional knowledge based innovations and commercialization, traditional medicine systems as practiced around the world, ethnoveterinary practices and food innovation to traditional governance and leadership systems among others. This book is an important resource for policymakers, scholars and researchers of cultural studies, leadership, governance, ethnobotany, anthropology, plant genetic resources and technology innovation, and readers interested in the history of knowledge and culture as well as cultural activists and political scientists. Features: Unique combination of social science and anthropological aspects with natural science perspectives. Includes summaries aimed at policymakers to immediately see what would be relevant to their work. Combines case studies illuminating important lessons learned with reviews and primary data. Multidisciplinary in the scope of the topics tackled and assemblage of contributors. Global footprint with contributions from Africa, Europe, North America, Asia and the West Indies. David R. Katerere, Department of Pharmaceutical Sciences, Tshwane University of Technology, South Africa; Wendy Applequist, William L. Brown Center, Missouri Botanical Garden, St. Louis, Missouri; Oluwaseyi M. Aboyade, Department of Pharmaceutical Sciences, Tshwane University of Technology, South Africa; and Nutritica SA, The Innovation Hub, Pretoria, South Africa.

Climate Change and Tourism in Southern Africa Jarkko Saarinen, Jennifer Fitchett, Gijsbert Hoogendoorn, 2022-03-30. This book explores the nature of climate change in southern Africa, its impacts on tourism and the resilience, adaptation and governance needs in various tourism operations and environments. Previous studies on climate change and tourism have mainly focused on the Global North and specific forms of tourism such as snow based winter activities. Drawing on case studies from a wide range of countries including South Africa, Lesotho, Namibia, Botswana and Zimbabwe, this book fills this lacuna by describing and analysing the climate change and tourism nexus in the southern African context. The book begins by providing an overview of the current and estimated impacts of climate change to the tourism industry in the region, highlighting the deepening socio-economic inequities and environmental and social injustices. It focuses on the importance of sustainable tourism in tackling these issues and highlights that resilience and robust governance and policy systems are essential for a tourism destination to successfully adapt to change. By synthesising the key lessons learned through this analysis, *Climate Change and Tourism in Southern Africa* also draws attention to specific adaptation and policy strategies which have value for other regions in the Global South. This book will be of great interest to students and scholars of climate change, tourism and environmental policy and justice.

Cyclones in Southern Africa Godwell Nhamo, David Chikodzi, 2021-09-28. Tropical cyclones in Southern

Africa also known as hurricanes or typhoons in other regions of the world is a hot subject for academic research This focus has been magnified by the need to consider tropical cyclones in the context of other global development agendas that includes the 2030 Agenda for Sustainable Development and its inseparable 17 Sustainable Development Goals SDGs the Paris Agreement the Sendai Framework for Disaster Risk Reduction and Habitat III s New Urban Agenda The ambitious SDGs challenge global and community leaders to make sure development addresses the nexus among poverty inequality and employment creation as well as care for the earth and its natural resources and biodiversity The SDGs further present an agenda to eradicate hunger bring quality education and sustain water and sanitation The infrastructure development human settlements sustainable consumption and production climate change biodiversity and the ocean blue economy agendas are also pitched Lastly the 2030 Agenda for Sustainable Development encourages partnerships on delivering various programmes and projects at all spatial levels However as tropical cyclones continue to make multiple landfalls and ravage Southern Africa and other parts of the world the achievement of the 2030 Agenda for Sustainable Development is threatened To this end this book addresses this gap by documenting the implications of tropical cyclones drawing examples and case studies from recent tropical cyclones such as cyclone Idai and cyclone Kenneth that resulted in catastrophic impacts in 2019 The book comes as part of a series with three volumes The other volumes include Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 2 Foundational and Fundamental Topics Given the foregoing the book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health

Terraced Landscapes Drago Kladnik, 2017-09-01

Terraced landscapes with agricultural terraces are cultural landscapes with a special value They provide food and also have priceless scientific cultural historical ecological aesthetic and even psychological philosophical and religious value They form a unique agricultural and ecological system that can be found throughout the world In some developed civilizations they were created in an organized manner over millennia and in others they arose completely spontaneously as people adapted to natural conditions and improved their opportunities to make a living They therefore reflect a harmony between man and nature and in many cases also between people themselves This volume presents them in pictures and words in all their diversity and attractiveness After discussing the global and European dimensions of terraced landscapes and their agricultural terraces the volume focuses on Slovenian terraced landscapes they are discussed separately by landscape types and sample cases in the territory of selected settlements pilot areas The conclusion also draws attention to the exceptional value and appeal of non agricultural terraced landscapes that have been shaped by nature and man _ _ _ _ _

Textbook of Forest Science Asim Kumar Mandal, Abel Nicodemus, 2025-02-14. This textbook presents the latest knowledge on various disciplines of forestry science presented in 39 chapters. Each chapter presents a reappraisal of theory and practice applications and future scope of subject area. It is a single point reference for updated information on both traditional and contemporary areas of forestry. Some of the disciplines covered in the book are biotechnology, remote sensing, forest certification, forest management, forest hydrology, climate change, plantation and urban forestry, biodiversity and genetic resources, conservation, wildfire science, seed science and quality seed production and ecosystem services. The book primarily serves as an advanced textbook of forest science for students of forestry at all levels. The science of forestry is receiving much more attention of the researchers, policy makers and public than ever before because of growing awareness of vital importance of forests in amelioration of world environment. This book is a comprehensive collection of existing and new methods including outcome and future possibilities of forest science. This book benefits undergraduate and postgraduate students, professional researchers, teachers, practicing foresters and policy planners. The book also encourages the public to understand the relevance of forest science to overcome the contemporary economic and environmental challenges.
