Geography Paper Memo 2014:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger,Elisabeth Springler,2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links

between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

The State of African Cities, 2014 United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
