Geography Paper Memorandum November 2013:

The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations international law has become an inescapable factor in world politics since the Second World War In recent years however international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law More international law paradoxically increases states political room of manoeuvre in world society

Decolonization and Conflict Martin Thomas, Gareth Curless, 2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation s violence exist *Decolonization and Conflict* brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe s empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propaganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare

Islam and the Liberal State Stephen H. Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively

shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening

Tin and Global Capitalism, 1850-2000 Mats Ingulstad, Andrew Perchard, Espen Storli, 2014-09-04 For most of the twentieth century tin was fundamental for both warfare and welfare The importance of tin is most powerfully represented by the tin can an invention which created a revolution in food preservation and helped feed both the armies of the great powers and the masses of the new urban society The trouble with tin was that economically viable deposits of the metal could only be found in a few regions of the world predominantly in the southern hemisphere while the main centers of consumption were in the industrialized north The tin trade was therefore a highly politically charged economy in which states and private enterprise competed and cooperated to assert control over deposits smelters and markets Tin provides a particularly telling illustration of how the interactions of business and governments shape the evolution of the global economic trade the tin industry has experienced extensive state intervention during times of war encompasses intense competition and cartelization and has seen industry centers both thrive and fail in the wake of decolonization The history of the international tin industry reveals the complex interactions and interdependencies between local actors and international networks decolonization and globalization as well as government foreign policies and entrepreneurial tactics By highlighting the global struggles for control and the constantly shifting economic geographical and political constellations within one specific industry this collection of essays brings the state back into business history and the firm into the history of international relations

Innovation and Modernisation in Contemporary Russia Imogen Sophie Kristin Wade, 2022-07-29 This book examines how technological modernisation and innovation policies have been implemented in Russia from the Soviet era to the present day It discusses how since about 2000 the Russian state has attempted to address the country's excessive dependence on natural resources by implementing an ambitious programme of economic modernisation including giving innovation more policy

prominence boosting state funding for research and development and innovation and emphasising science towns and technology parks as key instruments for stimulating innovation Based on extensive original research taking a multidisciplinary approach and including detailed case studies the book explains why despite these efforts Russia is performing comparatively poorly in innovation outcomes It argues that a key factor is the country's political economy model in which science technology and innovation policies are mainly controlled and funded by the federal centre of power and led by domestic political and economic elites
