Geography Mapwork June 2015:

Gaming and Geography Michael Morawski, Sebastian Wolff-Seidel, 2024-09-25 This book explores the uncharted territory where gaming and geography intersect in Gaming and Geography Education This book bridges the gap between video games and geography delving into the constructivist creative processes of game development gameplay and critical reflections on video games role in geographical discourses Through a multi perspective lens the book examines how video games can facilitate the exploration of geographic questions and act as catalysts for critical discourses Scholars shed light on the geographies presented in video games including their representations spatial images and policies By viewing video games as cultural and critical geography practices the authors enrich the political socio cultural and critical geographies associated with this medium A key argument of the book is that video games can foster systemic competence and networked thinking particularly in addressing complex socio ecological challenges like climate change and migration In contrast to traditional geography classes digital games provide valuable simulations of complex systems enhancing students understanding and skills The book also explores other possibilities such as digital field trips and language support to enhance the educational experience Gaming and Geography Education offers a compelling narrative that highlights the diverse roles video games can play in geographic education By exploring the intersection of gaming and geography this book deepens our understanding of this dynamic relationship and its impact on critical geographies within the realm of video games

Geography, Technology and Instruments of Exploration Professor Charles W J Withers, Dr Fraser MacDonald, 2015-12-28 The collection brings together scholars in the history of geographical exploration historians of science historians of technology and importantly experts with curatorial responsibilities for and museological expertise in major instrument collections Ranging in their focus from studies of astronomical practice to seismography meteorological instruments and rockets from radar to the hand held barometer the chapters of this book examine the ways in which instruments and questions of technology too often overlooked hitherto offer insight into the connections between geography and exploration

Geographers Hayden Lorimer, Charles W. J. Withers, 2015-12-14 Volume thirty one of Geographers Biobibliographical Studies brings together nine essays on leading geographers and their work With its publication the cumulative record of geographers lives and works in GBS exceeds 460 essays Here the editors bring forward critical appraisals of six French geographers and so illustrate the rich traditions of geographical scholarship in that country of a leading Portuguese figure a Briton who played a major role in establishing geography in modern New Zealand and a British woman who pioneered connections between the history of geography in practice and the histories of science and technology Geographers lives and geography s making is wonderfully illuminated in international national and cross disciplinary context

Travels Into Print Innes M. Keighren, Charles W. J. Withers, Bill Bell, 2015-05-11 The Age of Exploration and Discovery may well have started in the 15th century but for the British the 19th century saw the rise of the British Empire and an

explosion in world travel The travel narratives written during this century were profuse and by some estimates more travel narratives were written during the first half of the 19th century than in all preceding centuries These accounts tell of wondrous zoological and botanical finds of topography never before imagined and of exotic peoples as well At the time there was one publisher John Murray known for its utter domination of the travel narrative field The caliber and profile of their list was known throughout the UK and Europe and into the US as well The authors of the house included Jane Austen Lord Byron Washington Irving and Sir Walter Scott And in its list of travel writing and exploration the house boasted the authors Charles Darwin and Charles Lyell Murray s name became as synonymous with travel writing and exploration as it was with literary giants *Travels into Print* is a tour through the archives and files of the House of Murray and marvelous expedition in the geography of travel and exploration writing knowledge and reception in the 19th century Rather than focusing on narratives of a particular region or scientific area of interest or particular period the work uses a source that cuts across all of these areas the publisher Steeped in book files and correspondence about edits and revisions sent between Murray and his staff and explorers the book addresses the ways in which the texts were written the role of truth in the accounts correspondence as a form of production and the writings as travel documents This is a wonderful history of the book told from the perspective of a legendary book and author maker *The World of Maps* Library of Congress.
