Geography Memorandum 2014 November:

Propaganda and Ideology in the Russian-Ukrainian War Jon Roozenbeek, 2024-05-31 Russia's invasion of Ukraine is one of the most important conflicts of the twenty first century. With the start of military hostilities in 2014 also came an onslaught of propaganda to both convince and confuse audiences worldwide about the war's historical and ideological underpinnings. Based on extensive research drawing on tens of thousands of news articles and hundreds of pages of legal documents and internal correspondence, this book offers the first comprehensive analysis of the role of propaganda, ideology, and identity in the Russian-Ukrainian war. It argues that despite Russia's efforts to set up a media machine at home and abroad with eight years of propaganda legitimising Russia's presence in eastern Ukraine, Russia never managed to vocalise a convincing alternative to Ukrainian nationhood. Instead, Russian propaganda backfired: Ukraine is now more united than ever before.

Origination Andy Pike, 2015-06-02 *Origination: The Geographies of Brands and Branding* offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association. Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding. Challenges current interpretations of brands as vehicles of homogenization in globalization. Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under-researched geographical differentiation of commodity brands and branding. Presents innovative new research and analysis of the socio-spatial biographies of the Newcastle Brown Ale, Burberry, and Apple brands. Forges strong new connections between political and cultural economy approaches within geography. Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places.

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if both up and down the social ladder, meritocracy is a sham? Today meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy, but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits

prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30

People on the move face new barriers in a globalizing world. Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants. Notwithstanding the forces of globalization, states have maintained their monopoly power over whom to admit and whom to deny within their borders. In other words, they remain the sovereign authority regulating the entry and exit of people. However, in recent years, a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security. The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism, instability and criminality. The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced. These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone. This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants, although the focus is largely on the former. Despite the fact that most of the empirical studies are drawn from within Europe, the book also includes research on Nepal, Australia, the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this.

Migrant Protection and the City in the Americas Laurent Faret, Hilary Sanders, 2021-07-30 This book aims to establish a dialogue around the various urban sanctuary policies and other formal or informal practices of hospitality toward migrants that have emerged or been strengthened in cities in the Americas in the last decade The authors articulate local governance initiatives in migrant protection with a larger range of social and political actors and places them within a broader context of migrations in the Western Hemisphere including case studies of Toronto New York Austin Mexico City and Lima among others The book analyzes in particular the limits of local efforts to protect migrants and to identify the latitude of action at the disposal of

local actors It examines the efforts of municipal governments and also considers the role taken by cities from a larger perspective including the actions of immigrant rights associations churches NGOs and other actors in protecting vulnerable migrants HC 369 - Devolution: The Next Five Years and Beyond Great Britain. Parliament. House of Commons.

Communities and Local Government Committee,2016 The Government has announced a devolution revolution transferring powers and opportunities to local government through a series of devolution deals The Cities and Local Government Devolution Bill gives statutory authority to deals and enables some of the specific reforms the Government wishes to make such as introducing directly elected mayors for combined authorities This inquiry set out to examine the contents of the Bill and in particular whether Greater Manchester s deal is a model for other areas but its scope quickly widened to a review of the way in which devolution in England is proceeding The Committee has identified various aspects of the current approach that it recommends are refined and improved The Committee has found a significant lack of public consultation and engagement at all stages in the devolution process The public should be engaged in the preparation of devolution proposals insofar as possible during the negotiations and once the results of a deal have begun to make an impact and communicated to throughout the process This is particularly the case for health devolution where the systems in place are complex changes are consequently more difficult to understand and the public s response is likely to be more emotional The Committee also believes that the Government s approach to devolution in practice has lacked rigour as to process there are no clear measurable objectives for devolution It suggests various ways in which proper process can be ensured

The Politics of Immigration Tom K. Wong, 2017 Immigration has been deeply woven into the fabric of American nation building since the founding of the Republic Indeed immigrants have played an integral role in American history but they are also intricately tied to America's present and will feature prominently in America's future Immigration can shape a nation Consequently immigration policy can maintain replenish and even reshape it Immigration policy debates are thus seldom just about who to let in and how many as a nation's immigration policies can define its identity This is what helps breathe fire into the politics of immigration Against this backdrop political parties promote their own narratives about what the immigration policies of a nation of immigrants should be while undermining the contrasting narratives of political opponents Racial and ethnic groups mobilize for political inclusion as immigration increases their numbers but are often confronted by the counteractive mobilization of nativist groups Legislators calibrate their positions on immigration by weighing traditional electoral concerns against a new demographic normal that is reshaping the American electorate At stake are not just what our immigration policies will be but also what America can become What are the determinants of immigration policymaking in the United States The Politics of Immigration focuses the analytical lens on the electoral incentives that legislators in Congress have to support or oppose immigration policy reforms at the federal level In contrast to previous arguments Tom K Wong argues that contemporary immigration politics in the United States can be characterized by three underlying features the entrenchment of partisan divides among legislators on the issue of immigration the political implications of the demographic changes that are reshaping the American electorate and how these changes are creating new opportunities to define what it means to be an American in a period of
