Social Justice and the City Nik Heynen, 2020-06-09 This special collection aims to offer insight into the state of geography on questions of social justice and urban life While using social justice and the city as our starting point may signal inspiration from Harvey's 1973 book of the same name the task of examining the emergence of this concept has revealed the deep influence of grassroots urban uprisings of the late 1960s earlier and contemporary meditations on our urban worlds Jacobs 1961 1969 Lefebvre 1974 Massey and Catalano 1978 as well as its enduring significance built upon by many others for years to come Laws 1994 noted how geographers came to locate social justice struggles in the city through research that examined the ways in which material conditions contributed to poverty and racial and gender inequity as well as how emergent social movements organized to reshape urban spaces across diverse engagements including the U S Civil Rights Movement anti war protests feminist and LGBTQ activism the American Indian Movement and disability access This book originally published as a special issue of *Annals of the American Association of Geographers*

Homicide, Gender and Responsibility Kate Fitz-Gibbon, Sandra Walklate, 2016-03-22 The crime of homicide has long animated academic debate community concern and political attention The discussion has often centered on the perceived inadequacy of legal responses to homicide questions of culpability and divergent representations of victims and offenders Within this notions of gender responsibility and justice are pivotal This edited collection builds on existing scholarship by examining these concerns not only in the context of the private

world of domestic murder but also in the more public world of the state the corporation war and genocide In so doing this book draws from key frameworks of criminological thought legal analysis and empirical evidence to critically examine the relationship between homicide gender and responsibility Bringing together leading international criminology and legal scholars this collection provides a unique contribution to the academic and policy engagement with what is more often than not an ordinary and mundane crime Analysing the crime in a variety of different social contexts alongside an in depth and critical analysis of the interconnections between the ordinary act of lethal violence gender and notions of responsibility this book will be of interest to students scholars and policymakers working in criminology and socio legal studies **Handbook**

of Gentrification Studies Loretta Lees, Martin Phillips, 2018-04-27 It is now over 50 years since the term gentrification was first coined by the British urbanist Ruth Glass in 1964 in which time gentrification studies has become a subject in its own right This Handbook the first ever in gentrification studies is a critical and authoritative assessment of the field Although the Handbook does not seek to rehearse the classic literature on gentrification from the 1970s to the 1990s in detail it is referred to in the new assessments of the field gathered in this volume The original chapters offer an important dialogue between existing theory and new conceptualisations of gentrification for new times and new places in many cases offering novel empirical evidence

America's Poorest and Most Affluent Counties, 1980 to 2010 Wendy Shaw, 2021-08-28 This book explores the changing spatial distribution of the United States of America's poorest and most affluent counties over the 30 years from 1980 to 2010 While overall rates of poverty have changed somewhat during this period the geography of counties where affluence and poverty rates are the highest have also shifted as economic fortunes wax and wane The spatial understanding of poverty and affluence is an important dimension of addressing the complex economic and social contexts within which poverty occurs and which vary substantially depending on several factors While there has been significant focus on poverty in the United States including some analysis of its spatial characteristics since the 1960s there has been relatively little research on the concomitant geography of affluence The geographies of poverty and affluence analyzed in this book give a view of spatial economic segregation Spatial aspects of both the poorest and most affluent counties are focused on as well as the changing gap and relative geographies between rich and poor over three decades *Reinventing Detroit*

Michael Peter Smith, 2017-09-29 This book addresses the questions of what went wrong with Detroit and what can be done to reinvent the Motor City Various answers to the former deindustrialization white flight and a disappearing tax base are now well understood Less discussed are potential paths forward stemming from alternative explanations of Detroit's long term decline and reconsideration of the challenges the city currently faces Urban crisis socioeconomic fiscal and political has seemingly narrowed the range of possible interventions Growth oriented redevelopment strategies have not reversed Detroit's decline but in the wake of crisis officials have increasingly funnelled limited public resources into the city's commercial core via an implicit policy of urban triage The crisis has also led to the emergency management of the city by extra

democratic entities As a disruptive historical event Detroit's crisis is a moment teeming with political possibilities The critical rethinking of Detroit's past present and future is essential reading for both urban studies scholars and the general public
