The reasons are multi faceted ranging from the complexity of the diverse workflows being computerized, the intricate nature of health organizations, the knowledge and skills of users, to other reasons such as strategies for obtaining key executive support, weaving through the politics peculiar to the institution, and technical facets including the usability of systems. Thus the art and science of successfully implementing systems remains deeply layered in elusiveness. Still, given the pervasiveness of system implementa tions and the importance of the outcomes, this is a critical topic especially for nurses and informatics nurse specialists. *HIPAA Compliance Handbook ,2003*
