Histoire De La Physique Sciences:

Art d'enseigner la physique (L') , Inspiring air: A history of air-related science Pere Grapí,2019-07-15

Eudiometers were instruments originally devised for checking the goodness of common air Seeking to be more than just a chronological inventory of eudiometers this book presents a unique retrospective of these fascinating apparatuses from the end of the eighteenth century to the mid nineteenth century By paying particular attention to the experimental procedures involved over the course of the test this book aims to understand and explore how eudiometers function to describe the materials used in making them and the different reagents employed in each eudiometrical test Importantly eudiometers were employed within a variety of spheres including human and animal health gas analysis chemical theory plant and animal physiology atmospheric composition chemical compound composition gas lighting chemical revolution and experimental demonstration Finally this book looks to redress the existing imbalance in the history of chemistry regarding the attention given to theoretical aspects of chemistry in comparison to chemical practice and apparatus The few existing accounts of chemical devices written in the past century have not been sufficiently helpful for the understanding of experimental practice in chemistry Until now no work that deals exclusively with eudiometers and gas analysis from a historical standpoint has been published Thus this book will not only cast new light on the subject but will also contribute to further research on the history of chemical instruments

History, Historicity and Science Joseph Margolis,2016-12-05 This fresh collection of essays questions how the historical process affects our conception of science including our understanding of its validity as well as our general conception of knowledge The essays in this book consider the philosophical labours spanning the work of Descartes Kant and Hegel still the philosophical basis of our modern understanding of science as well as recent selected philosophers and historians of science such as Kuhn and Feyerabend Themes raised include the philosophical basis for the validity of science the possibility of ever knowing the independent world as it truly is and the intelligibility of construing scientific knowledge as a historical Taken separately and together these essays provide a sustained analysis of scientific claims to objective standing the historicity of thought and inquiry They point toward unfinished philosophical business and the need for a new beginning

Otte,2012-12-06 I Some Characteristic Features of the Passage From the 18th to the 19th Century 1 The following notes grew out of reflections which first led us to send out invitations to and call for papers for an interdisciplinary workshop which took place in Bielefeld from 27th to 30th November 1979 The status and character of this preface is therefore somewhat ambiguous on the one hand it does not comment extensively on the articles to follow on the other hand it could not have been

conceived and written in the way it was without knowledge of all the contributions to this volum which contains revised editions of papers for the workshop nor without the cooperation of the participants in the above mentioned symposium Furthermore although the following may sound slightly programmatic and summary we hope that it will be sufficiently explicit to provide some key words and concepts useful for further scholarly work Perhaps the most important result of our efforts is the very structure of these notes it is aimed at providing methodological orientations for the investigation of what turned out to be a very peculiar period in the history of science xi H N Jahnke and M Otte eds Epistemological and Social Problems of the Sciences in the Early Nineteenth Century xi xlii Copyright 1981 by D Reidel Publishing Company xii H N JAHNKE ET AL *Bibliotheca Mathematica* ,1905 *A Short History of Natural Science And Of The Progress of Discovery from the Time of the Greeks to the Present Day* Buckley,1879
