Historic Architecture of the Caribbean David Buisseret, 1980 **Architecture and Empire in Jamaica** Louis Nelson, 2016-03-15 Through Creole houses and merchant stores to sugar fields and boiling houses Jamaica played a leading role in the formation of both the early modern Atlantic world and the British Empire Architecture and Empire in Jamaica offers the first scholarly analysis of Jamaican architecture in the long 18th century spanning roughly from the Port Royal earthquake of 1692 to Emancipation in 1838 In this richly illustrated study which includes hundreds of the author's own photographs and drawings Louis P Nelson examines surviving buildings and archival records to write a social history of architecture Nelson begins with an overview of the architecture of the West African slave trade then moves to chapters framed around types of buildings and landscapes including the Jamaican plantation landscape and fortified houses to the architecture of free blacks He concludes with a consideration of Jamaican architecture in Britain By connecting the architecture of the Caribbean first to West Africa and then to Britain Nelson traces the flow of capital and makes explicit the material economic and political networks around the Atlantic

Historic Architecture of the Caribbean David Buisseret, 1980 **A History of Architecture and Urbanism in the Americas** Clare Cardinal-Pett, 2015-11-19 A History of Architecture and Urbanism in the Americas is the first comprehensive survey to narrate the urbanization of the Western Hemisphere from the Arctic Circle to Antarctica making it a vital resource to help you understand the built environment in this part of the world The book combines the latest scholarship about the indigenous past with an environmental history approach covering issues of climate geology and biology so that you'll see the relationship between urban and rural in a new more inclusive way Author Clare Cardinal Pett tells the story chronologically from the earliest known human migrations into the Americas to the 1930s to reveal information and insights that weave across time and place so that you can develop a

complex and nuanced understanding of human made landscape forms patterns of urbanization and associated building typologies Each chapter addresses developments throughout the hemisphere and includes information from various disciplines original artwork and historical photographs of everyday life which along with numerous maps diagrams and traditional building photographs will train your eye to see the built environment as you read about it **Tourism in the Caribbean** David Timothy Duval,2004-07-31 This book brings together a high calibre team of international researchers to provide an up to date assessment of the scope of tourism and the nature of tourism development in the Caribbean past present and future **The Buildings of Peter Harrison** John Fitzhugh Millar,2014-10-20 Perhaps the most important architect ever to have worked in America Peter Harrison s renown suffers from the destruction of most of his papers when he died in 1775 He was born in Yorkshire England in 1716 and trained to be an architect as a teenager He also became a ship captain and soon sailed to ports in America where he began designing some of the most iconic buildings of the continent In a clandestine operation he procured the plans for the French Canadian fortress of Louisbourg enabling Massachusetts Governor William Shirley to capture it in 1745 This setback forced the French to halt their operation to capture all of British America and to give up British territory they had captured in India As a result he was rewarded with commissions to design important buildings in Britain and in nearly all British colonies around the world and he became the first person ever to have designed buildings on six continents He designed mostly in a neo Palladian style and invented a way of building wooden structures so as to look like carved stone wooden rustication He also designed some of America s most valuable furniture including inventing the coveted block front and introducing the bombe motif In America he lived in Newport Rhode Island and in New Haven Connecticut where he died at the beginning of the War of Independence Protecting Historic Architecture and Museum Collections from Natural Disasters Barclay G. Nelson,2017-07-05 Slavery Geography and Empire in Nineteenth Century Marine Landscapes of Montreal and Jamaica is

among the first Slavery Studies books and the first in Art History to juxtapose temperate and tropical slavery Charmaine A Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest One could easily assume that nineteenth century Montreal and Jamaica were worlds apart but through her astute examination of marine landscape art the author re connects these two significant British island colonies sites of colonial ports with profound economic and military value Through an analysis of prints illustrated travel books and maps the author exposes the fallacy of their disconnection arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain s global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations The first study to explore James Hakewill s Jamaican landscapes and William Clark s Antiguan genre studies in depth it also examines the Montreal landscapes of artists including Thomas Davies Robert Sproule George Heriot and James Duncan Breaking new ground Nelson reveals how gender and race mediated the aesthetic and scientific access of such mainly white male artists She analyzes this moment of deep political crisis for British slave owners between the end of the slave trade in 1807 and complete abolition in 1833 who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance Nelson explores how vision and cartographic knowledge translated into authority which allowed colonizers to civilize the terrains of the so called New World while belying the oppression of slavery and indigenous displacement
