Anderson, 2024-10-30 First Published in 1971 The Festivals of Nepal describes the most important festivals from the country which have been arranged according to the ancient Nepalese calendar beginning with the New Year in mid April The author provides moreover a brief introductory sketch of Nepalese geography history and religion to give background to what follows When Mary Anderson began her five year residence in Kathmandu as the wife of a diplomat she attended the frequent Nepalese festivals up and down the Valley because they were mysterious colourful and great fun But soon she became more deeply absorbed in the meaning of these ancient activities as she grew quickly aware that to the Nepalese themselves the ancient processions and rituals were of great importance Somewhere almost every day there seems to be in Nepal a festival of some kind but now that this hitherto secret land has been opened up to tourists and foreign influences much of this historic pageantry may well be lost The modernization of Nepalese society is certain to have its effects but when these artless celebrations become the goal of spectators from outside they will also lose its spontaneity Mary Anderson was determined to record as many of them as she could explaining their mythological religious and historical backgrounds and relating some of the wealth of legends and folk tales that surround them This is an interesting read for students of sociology of culture South Asian studies South Asian religion and culture and Hindu religion *Bleeding Mountains of Nepal* Aditya Man

*EXCOMMUNICATED IN THE NAME OF GOD* Ruben Ygua,2025-04-10 Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections
