Tymieniecka,2012-10-24 The classic conception of human transcendental consciousness assumes its self supporting existential status within the horizon of life world nature and earth Yet this assumed absoluteness does not entail the nature of its powers neither their constitutive force This latter call for an existential source reaching beyond the generative life world network Transcendental consciousness having lost its absolute status its point of reference it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all establishing an original foundation of phenomenology in the primogenital onto poiesis of life      **Genre et fondamentalismes/Gender and Fundamentalisms** Fatou Sow,2018-09-26

When why and how can religion and culture be both sources and places of expression for fundamentalisms particularly in relation to politics Those are the central questions asked throughout this book alongside a discussion on the result when religion strenthened by culture is used as a political tool to access moral and social power Cultural and religious messages often form the basis of decisions laws and programs made in politics and have a direct effect on society in general and on women and gender relations in particular The various forms taken by fundamentalisms in some African countries and the contexts under which they have emerged the ways in which they re shape identities and relationships between men and

women are also analysed in this book These fundamentalisms are frequently sources of concern in social debates in feminist and feminine organizations as well as in academia and politics The manipulation of cultures and religions are becoming progressively political and consequently can cause social discrimination or even physical moral and symbolic violence
