Aerodynamic Design of Transport Aircraft Ed Obert, 2009 The origin of *Aerodynamic Design of Transport Aircraft* stems from the time when the author was appointed part time professor in the Aerospace Faculty of Delft University of Technology At the time his main activities were those of leading the departments of Aerodynamics Performance and Preliminary Design at Fokker Aircraft Company The groundwork for this book started in 1987 as a series of lecture notes consisting mainly of pictorial material with a minimum of English explanatory text After the demise of Fokker in 1996 one feared that interest in aeronautical engineering would strongly diminish As a result of this the course was discontinued and the relationship between the author and the faculty came to an end Two years later the situation was reappraised and the interest in aeronautical engineering remained so the course was reinstated with a former Fokker colleague Ronald Slingerland as lecturer The lecture notes from these courses form the foundation of this publication

Air Crash Investigations: The Crash of Helios Airways Flight 522 Hans Griffioen, 2009-06-01 On 14 August 2005 a Boeing 737 300 aircraft departed from Larnaca Cyprus for Prague As the aircraft climbed through 16 000 ft the Captain contacted the company Operations Centre and reported a Take off Configuration Warning and an Equipment Cooling System problem Thereafter there was no response to radio calls to the aircraft At 07 21 h the aircraft was intercepted by two F 16 aircraft of the Hellenic Air Force They observed the aircraft and

reported no external damage The aircraft continued descending and crashed approximately 33 km northwest of the Athens International Airport All 121 people on board were killed
