

## Foreword

The information contained in this manual relates to all 407X/408 2000<sup>TM</sup> vehicles, unless otherwise specified.

### Safety Information

---

#### Airbag Warning Statement

#### WARNING

##### VEHICLES EQUIPPED WITH AIR BAGS

An air bag inflates with great force. **DO NOT** place objects, including non-suspension equipment, in the area over the air bag or in the air bag deployment area. If the non-suspension equipment is dangerously installed and the air bag inflates, this could cause serious injury.

- Installation of vehicle non-suspension equipment should be performed by a professional installer/technician qualified in the requirements for such installations. An air bag's size, shape and deployment area can vary by vehicle make, model and front suspension configuration (e.g., truck seat vs. bucket seat).
- Consult the vehicle manufacturer's suspension instructions, if necessary, for specific air bag information for the vehicle make, model and front suspension configuration to be used in your non-suspension equipment installation.

#### FCC Safety Information

The Federal Communications Commission (FCC), with its action in Federal Order 78-146, March 13, 1988, has adopted a safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC-regulated equipment. Motorola adheres to the more safety standard for the use of its products. Proper operation of this radio will result in user exposure substantially below FCC recommended limits.

- **DO NOT** hold the radio with the antenna very close to, or touching, exposed parts of the body, especially the face, ear, or eyes, while transmitting. Hold the radio in a natural position with the microphone two to three inches away from the lips.
- **DO NOT** hold the handset portion (PTT) too close to actually desiring to transmit.
- **DO NOT** allow children to play with any radio equipment containing a transmitter.
- **DO NOT** operate this equipment near electrical blasting caps or in an explosive atmosphere. Under certain conditions, radios can interfere with blasting operations. When you are in the vicinity of construction work, look for, and observe, signs indicating against radio transmissions. Radio transmission is prohibited, you must not transmit and use of the area. Furthermore, you must turn off your radio to prevent any accidental transmission.
- **DO NOT** replace or change batteries in a location where an electrical sparking may occur while installing or removing batteries and cause an explosion.
- Turn the radio off when removing or installing a battery.

Anyone intending to use a radio in a hazardous area is advised to become familiar with the subject of intrinsic safety and with Section 71 of the National Fire Code, which is commonly referred to as Article 500 of the National Electric Code. Use of anything but factory supplied components may affect the approval and safety of the radio. Likewise, it is advised that servicing should be performed only by qualified personnel who adhere to the following Factory Mutual (FM) required warning:

#### WARNING

**Modification of FM approved intrinsically safe radio will negate Factory Mutual Research Corporation (FMC) approval.**
