**New China** Jim Hammond, 2014-01-23 One has to marvel at the tremendous material progress of China under the New China concept The sweeping skyscrapers the architectural creations of the Olympics and space successes are a wonder to behold But there are other criteria by which a nation should be judged Shouldnt the spiritual and political advancement of the people also have equal importance If the people are kept in a gilded cage can that be good even though you fill their bellies and clothe them beautifully This book is dedicated to stripping away the glitzy exterior and taking a hard look at the sinister interior President Reagan used the blunt but realistic term Evil Empire which is closer to the truth In this case it is the evil dragon the Chinese Communist Party that towers above the law and the Chinese Constitution that is the terrible truth It has no limits and no purpose in life other than its survival regardless of human cost In its wake it destroys all human dignity of individual expression in exchange for material wealth It demands unthinking obedience for the material rewards

Rosenbaum, Adrian Martin, 2019-07-25 The idea of cinephilia is a crucial one for students of the cinema but it is often associated with a bygone arthouse era At the beginning of the twenty first century corporatism public relations and bottom line accounting seem to govern mainstream film making Formula driven Hollywood blockbusters dominate the world marketplace In times like these can the love of cinema still flourish In fact contemporary cinema is stunningly varied and rich From Taiwan and Iran to Brazil and the Baltic states it is flourishing and constantly mutating Directors like Abbas Kiarostami Hou Hsiao hsien and Tsai Ming liang are making extraordinary films that are the equal of the great classics previously unrecognised works from the past are being discovered and new definitions and boundaries of genres are being formulated Even when this work is not widely distributed it is seen at film festivals on every continent and available on DVD and it is being discussed in a proliferating number of print and web publications Those who follow and share such work as contributors from around the world demonstrate in this book are forming new kinds of critical communities that enable significant exchanges between cultures at a time when other forces seem bent on keeping them mutually isolated In contrast to any talk of the death of cinema *Movie Mutations* pronounces the art form alive well and still developing in new and unforeseen directions In weaving together transnational discussions and debates *Movie Mutations* shows why the idea of cinephilia is just as relevant today as it ever was *Qualities of Education in a Globalised World* Diane Brook

Napier, 2014-09-11 In a growing revisionist tradition comparative educational scholars challenge conventional assumptions about quality education as a singular undertaking dominated by standardised assessments and globalisation influences The contributors to this volume illustrate the complexities and global dimensions of educational quality that emerged in their research Several chapters critique educational reforms employing assessments aligned to global standards and large scale assessments revealing how considerations of contextual factors internal needs and local traditions are essential for developing a quality curriculum or for overhauling a national education system Most chapters interrogate the uses and misuses of standardised assessment results The contributors reveal the importance of asking critical questions about quality education how to access it and for what purposes what contextual and cultural factors are important what implementation

issues and local level realities must be considered for true understanding of standardized assessment results what content skills and values are necessary and desirable ingredients what roles teachers and administrators play and what benefits accrue in terms of outcomes for employment and labor market needs or for achieving autonomy and stakeholder participation Critiques of narrow interpretations of standardised assessment data contrast with research based evidence that participation in large scale assessments such as PISA TIMSS and PIRLS can indeed be beneficial to identify needed reform refinements and implementation shortcomings Specific country cases include Brazil Canada the United States Spain Portugal Ukraine Kyrgyzstan and the Philippines Other chapters provide insights on quality education issues worldwide The volume offers readers a panorama of views on the diversity of paths to quality education
