Guide to Graphics Software Tools Jim X. Chen, 2007-08-23 Many scientists in different disciplines realize the power of graphics but are also bewildered by the complex implementations of a graphics system and numerous graphics tools More often than not they choose the wrong software tools and end up with unsatisfactory results Hopefully if we know how a graphics system works and what basic functions many graphics tools provide we can understand and employ some graphics tools without spending much precious time on learning all the details that may not be applicable and we can become graphics experts through such a shortcut Overview This book aims to be a shortcut to graphics theory programming tools and applications It covers all graphics basics and several advanced topics without including some implementation details that are not necessary in graphics applications It categorizes current graphics tools according to their applications and provides many weblinks to important resources on the Internet The purpose is to provide an exhaustive list of graphics tools with their major applications and functions The reference list may contain some inaccuracies since new tools are constantly emerging VI Preface and old tools become obsolete Through explaining and categorizing these graphics tools and their primary applications we hope to provide learners and researchers with different means and application areas in computer graphics and help them understand and use visualization modeling animation simulation virtual reality and many online resources

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2001 Wiro J. Niessen, Max A.

Viergever, 2003-06-30 In the four years of its existence MICCAI has developed into the premier annual conference on medical image computing and computer assisted intervention. The single track conference has an interdisciplinary character bringing together researchers from both the natural sciences and various medical disciplines. It provides the international forum for developments concerning all aspects of medical image processing and visualization, image guided and computer aided techniques and robot technology in medicine. The strong interest in MICCAI is confirmed by the large number of submissions we received this year which by far surpassed our expectations. The arrival of the shipload of papers just before the deadlines, one in the European and the other in the American time zone, was a particularly enjoyable experience as was the whole procedure of preparing the scientific programme. Both the quantity and quality of the submissions allowed us to compose a volume of high quality papers which we are sure will contribute to the further development of this exciting field of research. As for the hard numbers, in total 338 submissions were received. Next to full papers, short communications were solicited for works in progress, hardware prototypes and clinical case studies. Long papers were reviewed by three or four reviewers and short papers by two or three reviewers. The final selection of papers was carried out by the Programme Board. Out of the 246 long papers, 36 were accepted for oral presentation and 100 as full posters. An additional 75 of the long papers and 47 out of 92 short papers were accepted as short posters.

The papers cover almost every aspect of Biomedical Engineering, from artificial intelligence to biomechanics, from medical informatics to tissue engineering. They also come from almost all parts of the globe, from America to Europe, from the Middle East to the Asia Pacific. This set of papers presents to you the current research work being carried out in various disciplines of Biomedical Engineering, including new and innovative researches in emerging areas. As the organizers of Biomed 2008, we are very proud to be able to come up with this publication. We owe the success to many individuals who worked very hard to achieve this: members of the Technical Committee, the Editors, and the International Advisory Committee. We would like to take this opportunity to record our thanks and appreciation to each and every one of them. We are pretty sure that you will find many of the papers illuminating and useful for your own research and study. We hope that you will enjoy yourselves going through them as much as we had enjoyed compiling them into the proceedings.
