Keynes and his Contemporaries Atsushi Komine,2014-05-09 This book examines how the Cambridge School economists such as J M Keynes constructed revolutionary theories and advocated drastic policies based on their ideals for social organizations and their personal characteristics Although vast numbers of studies on Marshall Keynes and Marshallians have been published there have been very few studies on the Keynesian Revolution or Keynes s relevance to the modern world from archival and intellectual viewpoints which focus on Keynes as a member of the Cambridge School This book approaches Keynes from three directions person time and perspective The book provides a better understanding of how Keynes struggled with problems of his time and it also offers valuable lessons on how to survive fluctuating global capitalism today It focuses on eight key economists as a group in a public sphere rather than as a school a unified theoretical denominator and clarifies their visions and the widespread beliefs at the time by investigating their common motivations lifestyles values and habits

The Programming Approach and the Demise of Economics Franco Archibugi,2019-11-20 In this book the first of three volumes Franco Archibugi sets out to create an epistemology of economics arguing for a radical overturning of the conventional analysis from a positive approach to a programming approach This overturning leads to a reappraisal of the foundations of Economics itself and to an improved integration of Economics as an autonomous discipline alongside Sociology Political Science Operational Research Social Engineering and Physical or Spatial Planning The author interrogates how scientific the social sciences really are before proposing a new scientific paradigm for the social sciences a political preference function and a general programming approach The chapters revisit hitherto neglected economists like Gunnar Myrdal Ragnar Frisch Vassili Leontief and Leif Johansen using their theory to overturn the epistemological approach of the entire science of economics Volume II explores oppositions to the traditional and conventional teaching of economics whilst Volume III presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch s plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences

Handbook of Experimental Economic Methodology

Guillaume R. Fréchette, A. Schotter, 2015 The Handbook of Experimental Economic Methodology edited by Guillaume R Fr chette and Andrew Schotter aims to confront and debate the issues faced by the growing field of experimental economics For example as experimental work attempts to test theory it raises questions about the proper relationship between theory and experiments As experimental results are used to inform policy the utility of these results outside the lab is questioned and finally as experimental economics tries to integrate ideas from other disciplines like psychology and neuroscience the question of their proper place in the discipline of economics becomes less clear This book contains papers written by some of the most accomplished scholars working at the intersection of experimental behavioral and theoretical economics talking about methodology It is divided into four sections each of which features a set of papers and a set of comments on those papers The intention of the volume is to offer a place where ideas about methodology could be discussed and even argued Some of the papers are contentious a healthy sign of a dynamic discipline while others lay out a vision for how the authors think experimental economics should be pursued This exciting and illuminating collection of papers brings light to a topic at the core of experimental economics Researchers from a broad range of fields will benefit from the exploration of these important questions
